Child Development in Africa: Views From Inside Serpell, Kofi Marfo, 2014-12-19 In this volume African scholars engaged in research on the continent reflect on their recent and ongoing empirical studies. They discuss the strengths and limitations of research methods, theories and interventions designed outside Africa to spur innovative research on the continent. And they explore how insights from African philosophical, theoretical and empirical work can be combined with exogenous forms of knowledge to generate understanding of the processes of African children's development in ways that are responsive to local contexts and meaningful for indigenous stakeholders. A new field of African child development research is emerging in African societies focusing on children as valued and vulnerable members of society and potential civic leaders of the future. Systematic inquiries are now designed to enhance our understanding of how African children think to discover effective ways of communicating with them and to inform successful strategies of promoting their health, education and preparation for adult responsibilities in society. This is the 146th volume in this Jossey-Bass series *New Directions for Child and Adolescent Development*. Its mission is to provide scientific and scholarly presentations on cutting edge issues and concepts in this subject area. Each volume focuses on a specific new direction or research topic and is edited by experts from that field. Handbook of International Perspectives on Early Childhood Education Jaipaul L. Roopnarine, James E. Johnson, Suzanne Flannery Quinn, Michael M. Patte, 2018-02-21 The *Handbook of International Perspectives on Early Childhood Education* provides a groundbreaking compilation of research from an interdisciplinary group of distinguished experts in early childhood education, ECE, child development, cultural and cross-cultural research in the psychological sciences etc. The chapters provide current overviews of ECE in Latin America and the Caribbean, the Middle East, Asia, Australia, Africa, Europe, the US and Canada and convey how ECE is multi-sectorial, multi-cultural and multi-disciplinary, undergirded by such disciplines as neuroscience, psychological anthropology, cross-cultural human development, childhood studies and political science.
