Interpretation of Tax Treaties under International Law F. A. Engelen,2004 This publication considers the interpretation of tax treaties primarily from the standpoint of public international law The principal purpose of this study is to analyse and discuss the rules and principles of international law relevant to the interpretation of treaties in general and their application to tax treaties in particular The rules of international law enshrined in articles 31 32 and 33 of the Vienna Convention on the Law of Treaties are therefore central to this study Where appropriate reference is made to the jurisprudence of the International Court of Justice and to the law and procedure of other international court and tribunals Considers also the extent to which the relevant rules and principles of international law are binding on domestic court and taxpayers The importance of international law for the purpose of the interpretation of tax treaties is illustrated by a number of leading cases decided by the Dutch Supreme Court Hoge Raad

Introduction to the Law of Double Taxation Conventions Michael

Lang, 2021-04-01 The Law of Double Taxation Conventions Cross border activities or transactions may trigger tax liability in two or more jurisdictions In order to mitigate the financial burden resulting from these situations States have entered into numerous double taxation conventions which provide for rules that allocate the taxing rights between the contracting states This handbook aims at providing an introduction to the law of double taxation conventions It is designed for students irrespective of their national background but the author believes that it will also be of great help for tax experts who wish to know more about double taxation conventions as well as for international law experts who wish to understand more about tax law The handbook does not consider one jurisdiction in particular but rather takes examples from a wide range of different countries and their jurisdictions It includes an overview of the problem of double taxation the state practice in the conclusion of double tax conventions and their effects the interpretation of double taxation conventions and treaty abuse Furthermore this updated handbook takes new developments into account occurred since the last edition of the book from 2013 in particular also the changes through OECD's BEPS project and the Multilateral Instrument It deals with the latest versions of the OECD Model Tax Conventions on Income and on Capital and the UN Model Double Taxation Convention between Developed and Developing Countries both published in 2017 as well as the latest version of the OECD Model Double Taxation Convention on Estates and Inheritances and on Gifts **Klaus Vogel on Double Taxation Conventions** Klaus

Vogel, 1994-01-01 Following the structure of the main commentary this supplement supplies the reader with both the OECD's amendments and with cases rulings and literature published since the first edition Further it provides a preliminary analysis Thus this book if desired in conjunction with the main commentary keeps the reader current on international double taxation convention law as of March 1994 **Beneficial Ownership in International Tax Law** Angelika Meindl-Ringler, 2016-06-07

In international tax law the term beneficial ownership refers to which parties involved in a cross border transaction are entitled to tax treaty benefits However determining beneficial ownership is a complex and often disputed issue subject to different meanings in different countries Archival research on its early use in tax treaties and in the developing OECD Model reveals that its meaning has changed dramatically over the decades leading to new interpretations significantly affecting current tax practice and scholarship This book dedicated to establishing how beneficial ownership should ideally be interpreted compares the use and interpretation of beneficial ownership both current and historical in a wide range of national jurisdictions as well as the EU ultimately shedding a clearer light than has heretofore been available on the meaning of the term In her very thorough analysis of the application of beneficial ownership the author touches on such aspects as the following historical development of the beneficial ownership requirement as used in tax treaties and in the OECD Model Tax Convention on Income and on Capital rules of double taxation conventions application of the OECD's Action Plan on Base Erosion and Profit Shifting BEPS the problem of so called white income use of the substance over form principle attribution of income rules and the role of agents nominees and conduit companies Specific analysis of the use and interpretation of

beneficial ownership in a domestic law and treaty context in numerous jurisdictions with particular emphasis on the United Kingdom Australia the United States and Germany is a major feature of the presentation As a thorough guide to determining whether a person claiming tax treaty benefits is the true owner and which parties are excluded from treaty benefits and to what extent this book will be of immeasurable value to lawyers tax authorities policymakers and other professionals working with taxable international transactions of any kind

Taxation of Capital Gains Under the OECD Model Convention

Stefano Simontacchi,2007-01-01 Increasing globalization and the related cross border flows of capital resources has only increased interest in the taxation of transnational capital gains among practitioners and scholars This is particularly true as it relates to investments in immovable property As a consequence Article 13 of the OECD Model Convention covering capital gains has emerged as one of the document s key provisions Based on in depth historical research this book pays particular attention to the definition of capital gains falling within the scope of Article 13 It also thoroughly analyses the treaty regime applicable to gains derived from the alienation of both immovable property and shares of immovable property companies

International Tax Planning and Prevention of Abuse Luc De Broe,2008 This study considers how tax authorities attempt to strike down international tax avoidance structures in particular those involving the use of conduit and base companies set up by third country residents for purposes of treaty shopping and EC Directive shopping The book focuses on the interaction between provisions and judicially developed doctrines of domestic tax law preventing international tax avoidance on the one hand and norms of international law in particular tax treaties and rules of Community law on the other It also considers treaty based anti avoidance measures such as the beneficial ownership requirement and limitation on benefits provisions This part of the study compares and analyses the case law of Australia Austria Belgium Canada the Czech Republic Finland France Germany India the Netherlands Switzerland the United Kingdom and the United States
