Context and Culture in Language Teaching Claire Kramersch, 1993-06-17 This book takes cultural knowledge in language learning not only as a necessary aspect of communicative competence but as an educational objective in its own right If the aim of foreign language education is to foster cross cultural awareness and self realization language pedagogy needs to come to grips with a range of fundamental issues what do we mean by cultural context Can discourse practices be taught like rules of grammar What role does literature play in the development of second language literacy How can learners acquire both an insider s and an outsider s understanding of the foreign culture as expressed through its language By exploring these and other issues the book can help language teachers reflect on their profession and place it within its larger societal and educational context In turn they can help learners become not only skilful users of the language but also active architects of a new cross cultural world order

Fostering Culture Through Film Elda Buonanno Foley, Patrizia Comello Perry, 2016-05-11 The perceived lack of understanding of cultural diversity in the American learning community has led instructors to challenge assumptions and stereotypes while addressing misconceptions Teachers of foreign languages and cultural studies in particular feel the need to redesign curricula and lesson plans to better serve the learning community of the twenty first century The common starting point resides in the paradox that exists in today s connected world while global access to information makes learners aware of the infinite variety of cultural diversity it does not however make them critical thinkers For this reason there is opportunity to reshape critical thinking within a more global perspective while enhancing the tools to identify interpret and compare the different cultural models that learners encounter The book demonstrates the theories and practical applications by which instructors use contemporary film to provide insightful readings on diverse local communities communities that form the basis of global culture This collection of essays will serve as a pedagogical tool and resource offering methods and examples of a communicative approach to analyze and integrate cultural diversities similarities and problems in the second language curricula methods that expose students to different cultural models while scaffolding their critical approach to multiple layers of common and specific values This work will encourage a dialogue and long lasting conversation on methodologies and teaching strategies rethought reapplied and remolded to the new learning environments

Cultural Studies in the EFL Classroom Werner Delanoy,Laurenz Volkmann,2006 *Language Rights and Cultural Diversity* Xabier Irujo Ametzaga,Viola Miglio,2014 There are around 6 000 living languages in the world but as of 2012 less than 4 percent of them can claim official status in one of more of the 196 existing states This lack of official status along with other cultural political and legal factors is contributing to a worldwide loss of linguistic diversity and cultural richness The essays in this book explore the many facets of language rights and language protection from a variety of theoretical legal and academic perspectives Important lessons are taken from the Basque case in Europe and Native American and French Canadian cases in North America Woven throughout the book is the belief in the power of discourse and research to protect and even enhance linguistic diversity through legal recognition and other means Language protection however is only possible if we encourage the acceptance of cultural diversity and multilingualism as a positive outcome for the whole population of the state not just for a minority with in it We should abandon the idea of the monolingual mono cultural nation state and encourage the population of each country to adopt the concept of a multi cultural state Learning Language and Culture Via Public Internet Discussion Forums B. Hanna,Juliana De Nooy,2009-03-31 Public Internet discussion forums offer vast possibilities for interaction with speakers of other languages with newspaper websites from many countries proposing forums on a smorgasbord of topics from travel to tertiary education to techno music These sites provide opportunities both for authentic foreign language practice and for developing intercultural competence Currently however public forums are

largely ignored by language educators in favour of purpose built exchanges between learners The authors investigate the untapped pedagogical potential of these forums Drawing on examples from English and French language media websites they explore cultural differences in public forum discussion and propose guidelines for participating effectively and maximising the learning opportunities Case studies highlight the skills needed to venture beyond learner to learner interaction and engage with another culture autonomously in roles other than that of student The emphasis on strategies for successful and culturally sensitive interaction in authentic contexts makes the book a valuable tool for teachers and learners of any language
