

KUMON® DESCRIPTION OF STUDY LEVELS - MATH

Level	Samples			Highlights
7A	7A 75a 	7A 76b 	7A 151a 	Students count up to 10 pictures and dots individually and as a group. Mastery is gradual and the eventual goal is for students to be able to say the total number of objects in each group without counting.
6A	6A 37a 	6A 300a 	6A 173a 	Students count up to 30 using pictures and numbers. Gradually, students learn to recognize groups of up to 20 dots without counting them individually.
5A	5A 41a 	5A 147a 	5A 187a 	Students learn to use a pencil through line tracing exercises, beginning with short lines and advancing to long curved lines. The curved lines gradually take the shape of large numbers. This develops the fine motor skills needed to trace and write numbers independently and teaches the natural stroke order required for number formation. Students also develop their concentration ability and learn to recite numbers up to 50.
4A	4A 40a 	4A 75a 	4A 151b 	Students learn to write numbers up to 50. Students deepen their understanding of the number sequence through writing consecutive numbers and filling in the blanks in number tables, number boards, and complete-the-sequence problems. By the end of the level, students learn to read up to 100.
3A	3A 60b 	3A 74a 	3A 195a 	Students continue to enhance their understanding of the sequence of numbers as well as the number-writing skills that they developed in Level 4A. Students are introduced to addition in Level 3A. At first, they master +1, +2, through to +3 individually. The last 20 sheets of this level are dedicated to addition questions from +1 to +3.
2A	2A 31a 	2A 78b 	2A 200b 	In this level, students further develop basic mental calculation skills in addition through a sequential study of adding 1 through adding 10. It is very important that students master the contents of this level for smooth progress in subsequent levels. Level 2A aims to develop the concentration ability and work skills necessary for Level A.
A	A 100a 	A 100a 	A 100a 	Level A continues horizontal addition with larger numbers. Mastering addition involves a smooth introduction to subtraction in this level. This level aims to develop mental calculations, while strengthening students' concentration ability and their work skills.
B	B 100a 	B 100a 	B 100a 	This level teaches vertical addition and subtraction. Throughout B, students will encounter their first word problems in math. This level focuses on the advanced mental calculation skills learned in previous levels when students "play" in addition questions and "become" in questions involving subtraction. Mastery of Level B greatly reduces errors in multiplication and division in Levels C and D.
C	C 100a 	C 100a 	C 100a 	Students master the multiplication tables by practicing until they can answer immediately. Next, students learn up to 4-digit by 1-digit multiplication with mental components. Once multiplication is mastered, single division by 1-digit is introduced. Students who have developed good mental calculation ability will not have to write division steps.
D	D 100a 	D 100a 	D 100a 	Students learn double-digit multiplication before advancing to long division. In this challenging section, students develop working skills that will be necessary for future fraction work. Once students' ability to work with all arithmetic operations is confirmed, they begin to study fractions, learning to reduce using the Greatest Common Factor.
E	E 100a 	E 100a 	E 100a 	Students learn to add, subtract, multiply, and divide. Fractions, proper, improper, mixed, and decimal, are emphasized. At the end of the level, students learn basic transformational conversions.
