Fertilizer Technology, 1979 Membrane Distillation Process Alessandra Criscuoli, 2021-09-10 The book deals with the latest research on membrane distillation New membrane and module designs low temperature applications integration with other membrane units and pilot scale investigations are presented and discussed **Hierarchical Control and Optimization Strategies Applied to Solar Membrane Distillation Facilities** Juan D. Gil, 2023-04-13 This book offers a systematic study of control algorithms applied in the operation of solar membrane distillation SMD facilities After a short introduction to membrane distillation systems powered by solar energy it reports on the various stages of the development of a comprehensive operating strategy based on modelling control and optimization techniques which enables an improved operation of SMD plants helping the commercialization of the SMD technology A special focus of the research was to maximize the distillate production of the MD modules while reducing their thermal energy consumption being those two important weaknesses of the current technology as well as their minimizing operating costs The optimised operating strategies were tested in a real pilot plant located at Plataforma Solar de Almer a dependency of the Centro de Investigaciones Energéticas Medioambientales y Tecnológicas CIEMAT of Spain All in all this thesis offers extensive information on control and modeling algorithms and on their practical applications in solar membrane distillation plants

Wearable Devices and Smart Technology for Educational Teaching Assistance Ul Rehman, Shafiq, 2024-12-24 Wearable devices and smart technology are revolutionizing educational teaching assistance offering innovative solutions to enhance learning experiences and support educators and students These technologies enable real time monitoring of student progress provide personalized learning insights and facilitate interactive lessons By integrating wearable devices with educational platforms teachers can access valuable data to adapt their teaching methods to individual needs while students can benefit from engaging learning opportunities As the education sector embraces these advancements wearable and smart technologies have the potential to create more inclusive adaptive and efficient teaching environments ultimately improving learning outcomes and accessibility *Wearable Devices and Smart Technology for Educational Teaching Assistance* discusses how to create a sustainable education system for the future generation and how to make the necessary changes To design a curriculum that is sustainable it examines innovative teaching methods the integration of technology and the importance of sustainability when it comes to curricula This book covers topics such as education technology security devices and teacher training and is a useful resource for educators engineers security professionals healthcare workers scientists academicians and researchers **Optimal Investment Decision-making for Highway Transportation Asset Management Under Risk and Uncertainty** Zongzhi Li, 2007 **Uncertainty Analysis in Engineering and Sciences: Fuzzy Logic, Statistics, and Neural Network Approach** Bilal M. Ayyub, Madan M. Gupta, 2012-12-06 Uncertainty has been of concern to engineers managers and scientists for many centuries In management sciences there have existed definitions of uncertainty

in a rather narrow sense since the beginning of this century In engineering and uncertainty has for a long time been considered as in sciences however synonymous with random stochastic statistic or probabilistic Only since the early sixties views on uncertainty have become more heterogeneous and more tools to model uncertainty than statistics have been proposed by several scientists The problem of modeling uncertainty adequately has become more important the more complex systems have become the faster the scientific and engineering world develops and the more important but also more difficult forecasting of future states of systems have become The first question one should probably ask is whether uncertainty is a phenomenon a feature of real world systems a state of mind or a label for a situation in which a human being wants to make statements about phenomena i e reality models and theories respectively One can also ask whether uncertainty is an objective fact or just a subjective impression which is closely related to individual persons Whether uncertainty is an objective feature of physical real systems seems to be a philosophical question This shall not be answered in this volume
