Shyamasree Ghosh, 2019-10-14 The immune system is a highly complex system with a large number of macromolecules, signaling pathways, protein-protein interactions, and gene expressions. Studies from genomics, transcriptomics, and metabolomics are generating huge high-throughput data that needs to be analyzed for understanding the immune system in Health and Disease. Computational approaches are helping in understanding the study of complex biology of immunology and thereby enabling design of therapeutic strategies in diseases like infectious diseases, immunodeficiency, allergic hypersensitive autoimmune disorders, and diseases like Cancer, HIV, etc. **Computational Immunology Basics** highlights the basics of the immune system and function in health and disease. This book offers comprehensive coverage of the most essential topics including Overview of Immunology and computational Immunology, Immune organs and cells, antigen-antibody, B cell, T cell, Antigen Processing and presentation, Diseases due to abnormalities of the immune system, Cancer Biology. Shyamasree Ghosh, MSc, PhD, PGDHE, PGDBI is currently working in the School of Biological Sciences, National Institute of Science Education and Research, NISER, Bhubaneswar, DAE Govt of India, graduated from the prestigious Presidency College, Kolkata, in 1998. She was awarded the prestigious National Scholarship from the Government of India. She has worked and published extensively in glycobiology, sialic acids, immunology, stem cells, and nanotechnology. She has authored several publications that include books and encyclopedia chapters in reputed journals and books.

Clinical Immunology and Serology Christine Dorresteyn Stevens, Linda E. Miller, 2016-10-05 The perfect balance of theory and practice. Kuby Immunology Jenni Punt, Sharon Stranford, Patricia Jones, Judy Owen, 2018-10-16 Janis Kuby's groundbreaking introduction to immunology was the first textbook for the course, actually written to be a textbook. Like no other text, it combined an experimental emphasis with extensive pedagogical features to help students grasp basic concepts. Now in a thoroughly updated new edition, **Kuby Immunology** remains the only undergraduate introduction to immunology written by teachers of the course. In the Kuby tradition, authors Jenni Punt, Sharon Stranford, Patricia Jones, and Judy Owen present the most current topics in an

experimental context conveying the excitement of scientific discovery and highlight important advances but do so with the focus on the big picture of the study of immune response enhanced by unsurpassed pedagogical support for the first time learner Punt Stranford Jones and Owen bring an enormous range of teaching and research experiences to the text as well as a dedication to continue the experiment based pedagogical driven approach of Janis Kuby For this edition they have worked chapter by chapter to streamline the coverage to address topics that students have the most trouble grasping and to continually remind students where the topic at hand fits in the study of immunology as a whole

Immunology at a Glance J. H. L. Playfair, B. M. Chain, 2012-09-11 Immunology at a Glance provides a user friendly overview of the body's defence mechanisms Ideal from day one of a medical biomedical or life science course the text begins with a basic overview of both adaptive and innate immunity before progressing to applied immunological concepts which look at what happens when things go wrong and how in clinical medicine each body system can be affected by immunity Each double page spread corresponds to a typical lecture and diagrammatically summarises core concepts in immunology through accessible schematic diagrams on left hand pages with key points concisely summarised on the right hand page There are also self assessment essay questions so you can test your knowledge New for this 10th edition Thoroughly updated and reorganised chapters offer greater clarity and easier understanding for those new to the subject New chapters on cytokine receptors and Immunology in the Laboratory A completely re-written section on autoimmunity A brand new companion website featuring self assessment questions and PowerPoint slides of images from the book ideal for teaching and revision at www.ataglanceseries.com/immunology Immunology at a Glance is the ideal companion for anyone about to start a new course in immunology and will appeal to medical and biomedical science students Perfect for exam preparation it provides the concepts and frameworks you need to succeed in your exam

Economic and Societal Transformation in Pandemic-Trapped India Subrata Saha, Mukunda Mishra, Anil Bhuiamali, 2022-02-04 This book acquaints the reader with the critical changes in India's economy and society amidst the unprecedented pandemic outbreak of COVID 19 which has been devastating by breaking all prior records of illness and fatality The present crisis is shown to be more than an acute health hazard as it carries with it other threats associated with the economy society culture psychology and politics The dynamic driving forces that have a significant bearing on life space and time are explored providing a basis on which social scientists can understand the prevailing equations and project the unforeseen future to contribute to a policymaking mechanism The Indian scenario presented here takes into account how the COVID 19 induced lockdown of transport services closing of factories and restrictions on mobilization have caused the economy to face a recession affecting mostly the unorganized sector Travel restrictions and quarantines affecting hundreds of millions of people have left Indian factories short of labour causing havoc in the production system Semi skilled jobholders have lost their employment and the country has witnessed the plight of large pools of migrant labourers returning on foot to their homelands hundreds of miles away with their families and

belongings Contributors to this volume are drawn from diverse disciplines displaying the solidarity of academic knowledge in a physically divided world This common platform is provided to the practitioners of relevant academic disciplines under the umbrella of regional sciences a forum for the exchange of ideas that may be effective in the sustainable management of the crisis and a way forward after it is mitigated Thought provoking discussions regarding different facets of the crisis are relevant not only to the current times but also to being prepared for the unforeseen post COVID economic and societal order

Biologically Inspired Cooperative Computing Yi Pan, Franz J. Rammig, Hartmut Schmeck, Mauricio Solar, 2006-11-24 In the world of information technology it is no longer the computer in the classical sense where the majority of IT applications is executed computing is everywhere More than 20 billion processors have already been fabricated and the majority of them can be assumed to still be operational At the same time virtually every PC worldwide is connected via the Internet This combination of traditional and embedded computing creates an artifact of a complexity heterogeneity and volatility unmanageable by classical means Each of our technical artifacts with a built in processor can be seen as a Thing that Thinks a term introduced by MIT's Thinglab It can be expected that in the near future these billions of Things that Think will become an Internet of Things a term originating from ETH Zurich This means that we will be constantly surrounded by a virtual organism of Things that Think This organism needs novel adequate design evolution and management means which is also one of the core challenges addressed by the recent German priority research program on Organic Computing **Loose-leaf**
