Land Expropriation And Compensation Payment In Ethiopia:

Land Rights and Expropriation in Ethiopia Daniel W. Ambaye, 2015-02-13 This thesis provides a new approach to the Ethiopian Land Law debate The basic argument made in this thesis is that even if the Ethiopian Constitution provides and guarantees common ownership of land together with the state to the people this right has not been fully realized whether in terms of land accessibility enjoyability and payment of fair compensation in the event of expropriation Expropriation is an inherent power of the state to acquire land for public purpose activities It is an important development tool in a country such as Ethiopia where expropriation remains the only method to acquire land Furthermore the two preconditions of payment of fair compensation and existence of public purpose justifications are not strictly followed in Ethiopia The state remains the sole beneficiary of the process by capturing the full profit of land value while paying inadequate compensation to those who cede their land by expropriation Secondly the broader public purpose power of the state in expropriating the land for unlimited activities puts the property owners under imminent risk of expropriation *Planning Cities in Africa* Genet Alem Gebregiorgis, Stefan Greiving, Ally Hassan Namangaya, Wilbard Jackson Kombe, 2022-08-18 This open access book provides insights into challenges threats and opportunities of urban development in Africa It discusses how and why African cities need localised urban planning concepts and theories to deal with challenges and threats of rapid urbanisation and climate change The book delivers an in depth view of the nature and gaps of the framework on which current planning practice and education in Africa are based With that it discusses the potentials of African cities to mobilise local knowledge resources and capacity building for sustained and resilient urban growth This work is addressed to educationists and practitioners in the field of urban development management climate change adaptation and urban resilience Specifically such audiences include researchers spatial planners graduate students and member of civil societies working on urban development management

Ethiopia's 'Developmental State' Tom Lavers, 2023-10-05 Ethiopia stands out as a leading example of state led development in Africa Tom Lavers offers in this book a comprehensive multi sector analysis of Ethiopia's development project examining how regimes maintain power during the extended periods required to bring about economic transformation Specifically Lavers explores how the Ethiopian Peoples Revolutionary Democratic Front EPRDF 1991-2019 sought to maintain political order through economic transformation and why the party collapsed leading to the outbreak of civil war in 2020 The book argues that the EPRDF sought to secure mass acquiescence through distribution of land and employment However rapid population growth and the limits of industrial policy in the contemporary global economy led to a distributive crisis that was a central factor in the regime's collapse This Ethiopian experience raises important questions about the prospects for economic transformation elsewhere on the continent This title is also available as Open Access on Cambridge Core at doi.org/10.1017/9781009428316 **Ethiopian Yearbook of International Law 2017** Zeray Yihdego, Melaku Gebeye Desta, Martha Belete Hailu, Fikremarkos Merso, 2018-08-02 The second volume of EtYIL brings together a number of articles

and other contributions that collectively take EtYIL's original mission of helping rebalance the narrative of international law another step forward. Like the first volume, this book presents scholarly contributions on cutting edge issues of international law that are of particular interest to Ethiopia and its sub region as well as Africa and developing countries more generally. The major issues tackled include the interplay between national and international in the promotion and regulation of foreign direct investment in Ethiopia, the regulatory framework for the exploitation and development of petroleum resources and relevant arbitral jurisprudence in the field, the role of international law in ensuring the equitable sharing of transboundary resources such as the waters of the River Nile or in the delimitation of the continental shelf in the region, the efforts to establish the Continental Free Trade Area in Africa and the lessons that can be learnt from prior experiments, Africa's policy towards the International Criminal Court and the feasibility of alternative means of serving justice in the case of grave crimes and the UN's peace keeping operations in their North-South context. The issues addressed in the various contributions are mostly at the heart of live political, diplomatic and judicial activities today and as such promise to shape the future of international law in the region and beyond. This volume not only takes a significant step further towards EtYIL's mission but also enriches it with fresh insights from perspectives that are not common in international law scholarship to this day.
