Philips, 1987-06-26 Most studies of gender differences in language use have been undertaken from exclusively either a sociocultural or a biological perspective By contrast this innovative volume places the analysis of language and gender in the context of a biocultural framework examining both cultural and biological sources of gender differences in language as well as the interaction between them The first two parts of the volume on cultural variation in gender differentiated language use comparing Western English speaking societies with societies elsewhere in the world The essays are distinguished by an emphasis on the syntax rather than style or strategy of gender differentiated forms of discourse but also often carry out the same forms differently through different choices of language form These gender differences are shown to be socially organized although the essays in Part I also raise the possibility that some cross cultural similarities in the ways males and females differentially use language may be related to sex based differences in physical and emotional makeup Part III examines the relationship between language and the brain and shows that although there are differences between the ways males and females process language in the brain these do not yield any differences in linguistic competence or language use Taken as a whole the essays reveal a great diversity in the cultural construction of gender through language and explicitly show that while there is some evidence of the influence of biologically based sex differences on the language of women and men the influence of culture is far greater and gender differences in language use are better accounted for in terms of culture than in terms of biology The collection will appeal widely to anthropologists psychologists linguists and other concerned with the understanding of gender roles *Gender and Language Theory and Practice* Lia Litosseliti, 2014-02-04 The book introduces both theoretical and applied perspectives identifying and explaining the relevant frameworks and drawing on a range of activities examples of how gender is constructed in discourse The book is divided into three parts Part I covers the historical background to the study of gender

and language moving on through past theoretical approaches to a discussion of current debates in the field with particular emphasis on the role of discourse analysis In Part II gender is examined in context with chapters focussing on gender and language in education the mass media and the workplace Finally Part III briefly looks at key principles and approaches to gender and language research and includes activities study questions and resources for teachers in the field Rich with examples and activities drawn from current debates and events this book is designed to be appealing and informative and will capture the imaginations of readers from a range of backgrounds and disciplines
