Creativity and the Global Knowledge Economy Michael A. Peters, Simon Marginson, Peter Murphy, 2009 This is a major work by three international scholars at the cutting edge of new research that investigates the emerging set of complex relationships between creativity design research higher education and knowledge capitalism It highlights the role of the creative and expressive arts of performance of aesthetics in general and the significant role of design as an underlying infrastructure for the creative economy This book tracks the most recent mutation of these serial shifts from postindustrial economy to the information economy to the digital economy to the knowledge economy to the creative economy to summarize the underlying and essential trends in knowledge capitalism and to investigate post market notions of open source public space The book hypothesizes that creative economy might constitute an enlargement of its predecessors that not only democratizes creativity and relativizes intellectual property law but also emphasizes the social conditions of creative work It documents how these profound shifts have brought to the forefront forms of knowledge production based on the commons and driven by ideas not profitability per se and have given rise to the notion of not just knowledge management but the design of creative institutions embodying new patterns of work

External Relations Dept., 2014-05-27 This chapter highlights various ways Asia's growth has affected the world economy The chapter also shows that if currency trends continue the Asian economy is expected to be larger than that of the United States and Europe combined Some Asian countries offer sophisticated financial markets and are centers for technological innovation while others are largely agricultural The study shows that the region is home to 700 million poor people about 65 percent of the world's poor a figure that stands in stark relief against Asia's economic strength and growing prosperity The chapter also references the inquiry by the managing editor of the Journal of Economic Perspectives into the rich and sometimes tortured relationship between economics and virtue      *Dark Matter* Gregory Sholette, 2010-11-05 Art is big business with some artists able to command huge sums of money for their works while the vast majority are ignored or dismissed by critics This book shows that these marginalised artists the dark matter of the art world are essential to the survival of the mainstream and that they frequently organize in opposition to it Gregory Sholette a politically engaged artist argues that imagination and creativity in the art world originate thrive in the non commercial sector shut off from prestigious galleries and champagne receptions This broader creative culture feeds the mainstream with new forms and styles that can be commodified and used to sustain the few artists admitted into the elite This dependency and the advent of inexpensive communication audio and video technology has allowed this dark matter of the alternative art world to increasingly subvert the mainstream and intervene politically as both new and old forms of non capitalist public art This book is essential for anyone interested in interventionist art collectivism and the political economy of the art world      *Cognitive Capitalism, Education, and Digital Labor* Michael A. Peters, Ergin Bulut (Ed), 2011 Cognitive capitalism sometimes referred to as third capitalism after mercantilism and industrial capitalism is an increasingly significant theory given its focus on the socio economic changes caused by Internet and Web 2.0 technologies that have transformed the mode of production and the nature of labor The theory of cognitive capitalism has its origins in French and Italian thinkers particularly Gilles Deleuze and Felix Guattari's *Capitalism and Schizophrenia* Michel Foucault's work on the birth of biopower and Michael Hardt and Antonio Negri's *Empire* and *Multitude* as well as the Italian Autonomist Marxist movement that had its origins in the Italian operaismo workerism of the 1960s In this collection leading international scholars explore the significance of cognitive capitalism for education especially focusing on the question of digital labor      *Making Meaning, Making Money* Lisa Andersen, Kate Oakley, 2008 Many practitioners and advocates have welcomed culture's new prominence in policy discourse and the new markets it offers for cultural production Others however see a danger that instrumental justifications for cultural funding risk overlooking the intrinsic qualities of culture reducing it to an input and blunting any radical edges This book asks Are we at a new moment for cultural policy Leading international thinkers from countries including Australia Britain and the United States provide a timely overview of these issues debating and discussing the directions that cultural policy should take in the
