Tigris and Euphrates Rivers: Their Environment from Headwaters to Mouth Laith A. Jawad, 2021-09-12 The system of the Tigris Euphrates Rivers is one of the great river systems of southwestern Asia. It comprises the Tigris and Euphrates Rivers which follow roughly parallel courses through the heart of the Middle East. The lower portion of the region that they run through is known as Mesopotamia, was one of the cradles of civilisation. There are several environmental factors that govern the nature of the two rivers and shape the landscape: the two rivers running through, Geological events, climate, water supply, the surrounding land, influences the vegetation and the physical and chemical features of water. The Tigris Euphrates system runs through the territory of four countries: Iraq, Iran, Turkey, and Syria. Therefore, any scientific approach to the environment of these two rivers should include the natural history events in these countries. The book *Tigris and Euphrates Rivers: Their Environment from Headwaters to Mouth* will be divided into nine parts. These parts deal with the issues of the environment: the status of the flora and fauna, the abiotic aspects, ecology, hydrological regime of the two rivers, the biotic aspects, Water resources, stress of the environment, conservation issues. Since the book of Julian Rzoska *Euphrates and Tigris: Mesopotamian Ecology and Destiny* in 1980, no book or major reference has been published that includes between its cover the facts and information that the present book will present. Therefore, the importance of the present book falls in stating the present status of the environment of the two rivers and the comparison of their environment between now and that of 37 years ago as given by J. Rzoska 1980. The recent studies showed that there are a large number of natural and political events that happened within the last three decades in the area of the Tigris Euphrates river system that for sure have done a great change to the environment of the two rivers and consequently changing the biological and non biological resources of the two rivers. This book will be a reference book to both Academic and students across the Middle East in different disciplines of knowledge to use in their researches on Tigris Euphrates river system. The scholars interested in this area will use this book as a guide to compare this freshwater system with other areas in Asia and the world.

Nairi Lands Guido Guarducci, 2019-12-19 This study analyses the social and symbolic value of the material culture in particular the pottery production and the architecture and the social structure of the local communities of a broad area encompassing Eastern Anatolia, the South Caucasus and North western Iran during the last phase of the Late Bronze Age and the Early Iron Age. This broad area is known from the Assyrian texts as Nairi lands. The second part of the study furnishes a reassessment of pottery production characteristics and theories as well as of the socio-economic structure and issues tied to the sedentary and mobile local communities of the Nairi lands. The study brings into focus the characteristics, the extension and the distribution of Grooved pottery along with other pottery typologies by providing an accompanying online catalogue with detailed descriptions and high resolution images of the pots and sherds.

obtained from public and private institutions in Turkey and Armenia Moreover the socio political organisation and subsistence economy issues are addressed in order to advance a possible reconstruction of the social structure of the Nairi lands communities Particular attention is devoted to the pastoral nomad component and the role played within the Nairi phenomenon The study includes a very large corpus of text images and high resolution color images of the pottery of the area under examination gathered by the author in order to offer a reliable tool and compendium

Routledge Handbook of Climate Change Impacts on Indigenous Peoples and Local Communities Victoria Reyes-García, 2023-12-26 This Handbook examines the diverse ways in which climate change impacts Indigenous Peoples and local communities and considers their response to these changes While there is well established evidence that the climate of the Earth is changing the scarcity of instrumental data oftentimes challenges scientists ability to detect such impacts in remote and marginalized areas of the world or in areas with scarce data Bridging this gap this Handbook draws on field research among Indigenous Peoples and local communities distributed across different climatic zones and relying on different livelihood activities to analyse their reports of and responses to climate change impacts It includes contributions from a range of authors from different nationalities disciplinary backgrounds and positionalities thus reflecting the diversity of approaches in the field The Handbook is organised in two parts Part I examines the diverse ways in which climate change alone or in interaction with other drivers of environmental change affects Indigenous Peoples and local communities Part II examines how Indigenous Peoples and local communities are locally adapting their responses to these impacts Overall this book highlights Indigenous and local knowledge systems as an untapped resource which will be vital in deepening our understanding of the effects of climate change The Routledge Handbook of Climate Change Impacts on Indigenous Peoples and Local Communities will be an essential reference text for students and scholars of climate change anthropology environmental studies ethnobiology and Indigenous studies The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license
