Demographic Change and Intergenerational Justice Joerg Tremmel, 2008-03-04 Intergenerational justice has been achieved if the opportunities of the members of the next generation to fulfill their needs are better than those of the members of the preceding generation For this each generation ought to leave for the next generation an amount of resources is at least equal to its own amount The book deals with the complex relationship between intergenerational justice and demographic change and is characterized by its interdisciplinary approach The authors come from a multitude of professional backgrounds and from several countries This illustrates the implications of the demographic shift from many different perspectives The book deals not only with the aspects of economic policy but also with environmental societal and philosophical issues The comprehensive volume is composed of five sections that pinpoint demographic trends examine the impact of demographic changes on key indicators investigate the relationship between key indicators and intergenerational justice scrutinize population policies and finally propose ways to implement long term thinking on these issues

International Migration and the Future of Populations and Labour in Europe Marek Kupiszewski, 2013-02-11 The changes of populations are determined by fertility mortality and migration On the national level international migration is a factor of increasing demographic economic social and political importance This book addresses the debate on the impact of international migration and economic activity on population and labour force resources in future It presents a study conducted for 27 European countries looking 50 years ahead 2002 2052 An extended discussion of theories and factors underlying the assumed evolution of the components of change and economic activity is included as well as a detailed analysis of the historical trends These theoretical and empirical considerations lead to defining scenarios of future mortality fertility economic activity and international migration which have been fed into a projection

model producing various future population dynamics and labour force trajectories In addition simulations have been made to estimate the size of replacement migration needed to maintain selected demographic and labour market parameters in the countries of Europe The results presented in this book allow researchers governments and policy makers to evaluate to what extent various migration and labour market policies may be instrumental in achieving the desired population and labour size and structures The secondary purpose of this volume is to reveal the methodology and argumentation lying behind a complex population forecasting and simulation exercise which is not done frequently but is critical for the assessment of the forecasts and also valuable from a purely didactic point of view **Advanced Introduction to Demography** Lutz,

Wolfgang,2021-09-10 Highlighting the power of multi dimensional demography this Advanced Introduction addresses the most consequential changes in our societies and economies using quantitative approaches It defines three demographic theories with predictive power demographic metabolism transition and dividend and repositions the discipline at the heart of social science Corporate Sustainability Paolo Taticchi,Paolo Carbone,Vito Albino,2013-06-13 Sustainability is one of the

key issues in today s society as confirmed by the increasing attention of governments media academia and the industry In the context of sustainable development businesses that are often referred to as part of the problem can become part of the solution This book presents the state of the art of sustainability in corporations from a number of perspectives which include economy finance measurement and reporting organizing for sustainability green products green buildings and IT The individual chapters provide valuable insights for pursuing future research and define a proper research agenda for the years to come Further the relevance of the topics addressed makes the book essential reading for academics practitioners consultants and more generally for all those interested in business evolution and sustainability The book was written by prominent researchers from Italy India the USA and the UK Facing Global Environmental Change Hans Günter

Brauch,Navnita Chadha Behera,Patricia Kameri-Mbote,John Grin,Úrsula Oswald Spring,Béchir Chourou,Czeslaw Mesjasz,Heinz Krummenacher,2009-06-04 The year 2007 could perhaps accurately be described as the year when climate change finally received the attention that this challenge deserves globally Much of the information and knowledge that was created in this field during the year was the result of the findings of the Fourth sessment Report AR4 of the Intergovernmental Panel on Climate Change IPCC which were disseminated on a large scale and reported extensively by the media This was the result not only of a heightened interest on the part of the public on various aspects of climate change but also because the IPCC itself proactively attempted to spread the findings of its AR4 to the public at large The interest generated on the scientific realities of climate change was further enhanced by the award of the Nobel Peace Prize to the IPCC and former Vice President of the US Al Gore By taking this decision in favour of a leader who has done a great deal to create awareness on c mate change and a body that assesses all scientific aspects of climate change and disseminates the result of its findings the Norwegian Nobel Committee has clearly drawn the link between climate change and peace in the
