Financial Models and Tools for Managing Lean Manufacturing David Meade, 2006-08-15 The effect Lean Manufacturing programs have on profit and loss statements during the early months of their implementation often causes them to be viewed as failures The length of time it will take traditional financial reports to reflect lean manufacturing improvements depends upon how poorly the operation was doing in terms of inventory management prior to the initiation of the lean effort As yet no one has put forth a set of methods for dealing with the finances and financial reporting issues dynamically during the implementation of lean practices until now Financial Models and Tools for Managing Lean Manufacturing provides an understanding of the impact that traditional accounting practices have on operational improvement programs The book shows managers of supply chains how to prepare for and present the impact of Lean Manufacturing to top management and stakeholders To illustrate the impact of lean manufacturing on the income statement the authors present a multi month Excel™ and Pro Model™ based manufacturing operation environment that incorporates actual sales sales forecasts and production results Their text gives supply chain managers the financial skills they need to successfully manage Lean Manufacturing and its impacts In short the book explains how existing accounting practices have a tendency to report the results of operational improvement programs in a negative light Other books have identified this issue but have not attempted to quantify the impact to a firm's profit and loss nor have they shown the impact over a series of reporting periods As a consequence although Lean Manufacturing practices are being adopted at an ever increasing rate they have not been eagerly embraced by manufacturers and supply chain managers Identifying the effects of past poor manufacturing practices that are being cleaned up by the operational improvements brought by the lean program the book arms you with the knowledge you need to defend the lean program through the months when income statements indicate a decline in profitability
