Bloomer, Charles Willard Moore, Robert J. Yudell, Buzz Yudell, 1977-01-01 Traces the significance of the human body in architecture from its early place as the divine organizing principle to its present near elimination Handbücher zur Sprach- und Kommunikationswissenschaft Hans Goebel, Herbert Ernst Wiegand, 1996 The Hidden Structure of Interaction Luigi Anolli, 2005 The idea of complexity states that most things tend to organize themselves into recurring patterns even when these patterns are not immediately visible to an external observer The general name for the scientific field concerned with the behaviour over time of a dynamic system is complexity theory The dynamic systems systems capable of changing over time are the focus of this approach and its concern is with the predictability of their behaviour The systems of interest to the complexity theory under certain conditions perform in regular predictable ways under other conditions they exhibit behaviour in which regularity and predictability is lost The concepts of stable and unstable behaviour are part of the traditional repertoire of physical science What is novel is the concept of something in between chaotic behaviour For chaos

here we refer to systems which display behaviour that though it has certain regularities defies prediction How does the order emerge from the chaos How can we predict the behaviour of a chaotic system Over the last 30 years and more trying to identify the hidden patterns behind chaotic behaviour became the focus of attention in a number of scientific disciplines These range as widely as astronomy chemistry evolutionary biology geology and psychology Communicating in the Third Space Karin Ikas, Gerhard Wagner, 2008-10-05 Communicating in the Third Space aims to clarify Homi K Bhabha's theory of the third space of enunciation by reconstructing its philosophical sociological geographical and political meaning with attention to the special advantages and ambiguities that arise as it is applied in practical as well as theoretical contexts The idea of third space conceives the encounter of two distinct and unequal social groups as taking place in a special third space of enunciation where culture is disseminated and displaced from the interacting groups making way for the invention of a hybrid identity whereby these two groups conceive themselves to partake in a common identity relating to shared space and common dialogue The essays collected in Communicating in the Third Space including a preface by Bhabha himself brilliantly introduce readers to this exciting topic in Cultural and Post Colonial theory and offers insightful elaboration and critique of the meaning and relevance of life in the third space With a preface by Homi K Bhabha People and Buildings Robert Gutman, 2011-12-31 There is at the present time a continuing interest in relating the behavioral sciences to design disciplines Sociologists and social psychologists have been added to faculties of architecture schools where they offer seminars and participate as programming specialists and design critics in studio courses Behavioral scientists in many European countries have collaborated with architects and planners in design work undertaken by governmental ministries and more recently have been participating in the work of private design firms Similar developments are now common in the United States In this fascinating study of the ecology of buildings biologists anthropologists sociologists psychologists and architects analyze the effect of working and living spaces on human behavior Focusing on such contemporary social problems as the influence of the physical environment on psychological stress mental illness family disorganization urban violence and delinquency the contributors show that we must respect the constraints that the environment and the nature of man impose on human adaptability The selections in People and Buildings have been written primarily by scientists and designers working in the behavioral mode The selections within each part have been arranged to provide an ordered argument or exploration of the general topic with which the part as a whole deals To facilitate the reader's appreciation of the argument each selection is preceded by a short prefatory statement In view of the fact that a single article or preface can hardly be representative of the depth of the literature that has developed around an argument Gutman has included an annotated bibliography which is keyed to the selections through the use of subheadings A new introduction by Nathan Glazer has been prepared for this edition *The Hidden Dimension* Edward Twitchell Hall, 1969 Societal Culture and Management Theodore D. Nunes,Cassandra Ozog,2024-07-11 Through the frame of Zoom this collection of essays examines the rapid emergence of videoconferencing in everyday life under COVID 19 its preexisting performative logic and the ongoing implication of these practices for millions of individuals and institutions The year 2023 marked the end of the World Health Organization s classification of the COVID 19 outbreak as a public health emergency of international concern yet many of the organizational and institutional restructurings that occurred in the rapid response to the pandemic have remained firmly in place The prevalence of videoconferencing in everyday life marks one such instance not only highlighting the dramatic social and cultural transformations that occurred during a period of lockdowns social distancing and stay at home orders but also serving as an index of all that has emerged as the new normal since March 2020 Overnight it seemed Zoom emerged as the default videoconferencing platform rapidly morphing from brand name to eponymous generic While this volume focuses predominantly on Zoom and its place in the collective imagination and daily practice of those of us whose lives are profoundly caught up in digital networks many of these insights presented here apply to other videoconferencing platforms as well and a supporting logic that has governed neoliberal lives since long before the first lockdowns began The twelve chapters in this collection explore how videoconferencing platforms in general and Zoom in particular have provided individuals and institutions new modes of engagement while at the same time reifying normalizing and domesticating modes of surveillance control and marginalization that have been part and parcel of a networked based performative logic for nearly a century

Fatal Words and Friendly Faces Larry G. Ehrlich,2000 On February 19 1998 the AAA Foundation for Traffic Safety reported that more than 12 000 people had been injured in incidents of road rage In light of modernity s rapid strides forward in electronic communication and lagging efforts to explore human nature Larry G Ehrlich s book focuses on the architecture of human communication behavior It is divided into three sections which deal with intrapersonal interpersonal and public communication This readable book not only offers a discussion on the most recent research in information technology and on relationships in a global community but it is a truly inter disciplinary approach to communication behavior

What's Wrong with the Poor? Mical Raz,2013-11-11 In the 1960s policymakers and mental health experts joined forces to participate in President Lyndon Johnson s War on Poverty In her insightful interdisciplinary history physician and historian Mical Raz examines the interplay between psychiatric theory and social policy throughout that decade ending with President Richard Nixon s 1971 veto of a bill that would have provided universal day care She shows that this cooperation between mental health professionals and policymakers was based on an understanding of what poor men women and children lacked This perception was rooted in psychiatric theories of deprivation focused on two overlapping sections of American society the poor had less and African Americans disproportionately represented among America s poor were seen as having practically nothing Raz analyzes the political and cultural context that led child mental health experts educators and policymakers to embrace this deprivation based theory and its translation into liberal social policy Deprivation theory she shows continues to

haunt social policy today profoundly shaping how both health professionals and educators view children from low income and culturally and linguistically diverse homes *Folklore* Dan Ben-Amos, Kenneth S. The extended self Chris Abel, 2016-10-28 In this wide ranging study of architecture and cultural evolution the author argues that underlying the global environmental crisis is a general resistance to changing personal and social identities shaped by a technology based culture and its energy hungry products The book traces the roots of that culture to the coevolution of Homo sapiens and technology from the first use of tools as artificial extensions of the human body to the motorised cities spreading around the world whose uncontrolled effects are changing the planet itself Advancing a new concept of the meme called the technical meme as the primary agent of cognitive extension and technical embodiment the author proposes a theory of the extended self encompassing material and spatial as well as psychological and social elements Drawing upon research from philosophy psychology and the neurosciences the book presents a new approach to environmental and cultural studies that will appeal to a broad readership searching for insights into the crisis
