The Reinvention of Development Banking in the European Union Daniel Mertens, Matthias Thiemann, Peter Volberding, 2021-01-21 National development banks NDBs have transformed from outdated relics of national industrial policy to central pillars of the European Union's economic project This trend which accelerated after the Financial Crisis of 2007 has led to a proliferation of NDBs with an expanded size and scope However it is surprising that the EU which has championed market oriented governance and strict competition policy has actually advocated for an expansion of NDBs This book therefore asks Why has the EU supported an increased role for NDBs and how can we understand the dynamics between NDBs and European incentives and constraints To answer these questions the contributing authors analyze the formation and evolution of a field of development banking within the EU identifying a new field around an innovative conceptualization of state backed financing for the purposes of policy implementation Yet rather than focusing solely on national development banks the authors instead broaden the focus to the entire ecosystem of the field of development banking which includes political institutions both in Brussels and in the member states financing vehicles such as the Juncker Plan regulatory bodies Directorate General for Competition Directorate General for Economic and Financial Affairs and commercial actors Seven in depth case studies on European NDBs along with three chapters on European level actors detail this field of development banking and answer the questions of when where and how development banking occurs within the EU

EIB Investment Report 2017/2018 European Investment Bank, 2018-09-07 The EIB Investment Report is the bank's flagship research report aiming to deepen our understanding of investment and investment financing in the EU. It presents and analyses the 2017 release of the EIB Investment Survey EIBIS of businesses in the EU which also includes a Europe-wide survey of municipal authorities. Following a theme of From recovery to sustainable growth it describes how the investment recovery in Europe continues to strengthen and become more broad-based across countries sectors and asset classes. Business investment is being driven by the improving outlook and efforts to keep pace with competitors but there is still need to improve business environment. This investment recovery is generally supported by good financing conditions for firms but deleveraging remains a drag. EU firms continue to be net savers overall suggesting that many firms are unwilling to invest despite a liquid financial position. Nonetheless with the improving economy there also emerge structural investment needs in innovation skills infrastructure and sustainability. The EU continues to fall behind global peers in terms of R D spending while other types of intangibles software training organisational capital etc prove to be just as important. Business environment has to improve further. Persistent financial fragmentation across the EU could slow convergence and reduce capacity to absorb shocks. This report indicates that there is a window of opportunity to address structural investment needs through both public and private investment with targeted policy intervention to ease specific constraints.
