options because the LPIC is the most widely known and respected Linux certification program in the world. Linux Journal recognized the LPI as the best Training and Certification Program. The exams were developed by the Linux Professional Institute, an international volunteer-driven organization with affiliates in a dozen countries. The core LPI exams cover two levels. Level 1 tests a basic knowledge of Linux installation, configuration, and command-line skills. Level 2 goes into much more depth regarding system troubleshooting and network services such as email and the Web. The second edition of *LPI Linux Certification in a Nutshell* is a thoroughly researched reference to these exams. The book is divided into four parts, one for each of the LPI exams. Each part features not only a summary of the core skills you need but sample exercises and test questions along with helpful hints to let you focus your energies. Major topics include GNU and Unix commands, Linux installation and package management, devices, filesystems, and kernel configuration, text editing, processing, and printing, the X Window System, networking fundamentals and troubleshooting, security including intrusion detection, SSH, Kerberos, and more, DNS, DHCP, file sharing, and other networking infrastructure, email, FTP, and Web services. Praise for the first edition: Although O'Reilly's *Nutshell* series are intended as desktop reference manuals, I have to recommend this one as a good all-round read, not only as a primer for LPI certification but as an excellent introductory text on GNU/Linux. In all, this is a valuable addition to O'Reilly's already packed stable of Linux titles, and I look forward to more from the author. First Monday
