The Encyclopedia Of Australian Architecture:

The Encyclopedia of Australian Architecture Philip Goad, Julie Willis, 2011-10-31 Behind the iconic images of Australian homesteads beach houses and the billowing sails of the Sydney Opera House lies a rich and enthralling history of how Australians have responded to natural and urban environments and in turn shaped Australian culture and society The Encyclopedia of Australian Architecture is the first major work of reference to be published on Australian architecture This magnificent book documents and analyses Australian architecture and architects from indigenous beginnings to colonial modern and contemporary eras With over 1000 entries from 200 contributors and 500 photographs and drawings The Encyclopedia of Australian Architecture provides an unparalleled compendium of architectural knowledge It is essential reading for all who care about the built environment

Architecture in Oceania (1840-1970) Michael Falser , 2025-10-28 Knowledge of colonial architecture in the South Pacific remains sparse with often overlooked connections to para colonial settings and postcolonial continuities This edited volume seeks to address these gaps focusing on the period from 1840 to 1970 across the broader South Pacific region Through in depth architectural case studies of buildings ensembles and urban projects the essays reflect on the complex interactions between locals and foreigners colonisers and the colonised and their shifting allegiances even across changing political powers With a rare focus on German colonial influences in the region the contributions go beyond the predominant narratives of British and French colonial influence This volume is a valuable resource for students and researchers of architectural history and colonial history in Oceania

A Critical History of Contemporary Architecture Dr Elie G Haddad, Asst Prof David Rifkind, Ms Sarah Deyong, 2014-03-28 This book provides a comprehensive critical overview of the developments in architecture from 1960 to 2010 The first section provides a presentation of major movements in architecture after 1960 and the second a geographic survey that covers a wide range of territories around the world This book not only reflects the different perspectives of its various authors but also charts a middle course between the aesthetic histories that examine architecture solely in terms of its formal aspects and the more ideological histories that subject it to a critique that often skirts the discussion of its formal aspects

Architecture and Urbanism in the British Empire G. A. Bremner, 2016-10-13 Throughout today's postcolonial world buildings monuments parks streets avenues entire cities even remain as witness to Britain's once impressive if troubled imperial past These structures are a conspicuous and near inescapable reminder of that past and therefore the built heritage of Britain's former colonial empire is a fundamental part of how we negotiate our postcolonial identities often lying at the heart of social tension and debate over how that identity is best represented This volume provides an overview of the architectural and urban transformations that took place across the British Empire between the seventeenth and mid twentieth centuries Although much research has been carried out on architecture and urban planning in Britain's empire in recent decades no single comprehensive reference source exists The essays compiled here remedy this deficiency With its extensive chronological and

regional coverage by leading scholars in the field this volume will quickly become a seminal text for those who study teach and research the relationship between empire and the built environment in the British context It provides an up to date account of past and current historiographical approaches toward the study of British imperial and colonial architecture and urbanism and will prove equally useful to those who study architecture and urbanism in other European imperial and transnational contexts The volume is divided in two main sections The first section deals with overarching thematic issues including building typologies major genres and periods of activity networks of expertise and the transmission of ideas the intersection between planning and politics as well as the architectural impact of empire on Britain itself The second section builds on the first by discussing these themes in relation to specific geographical regions teasing out the variations and continuities observable in context both practical and theoretical *Health and Architecture* Mohammad

Gharipour,2021-05-06 *Health and Architecture* offers a uniquely global overview of the healthcare facility in the pre modern era engaging in a cross cultural analysis of the architectural response to medical developments and the formation of specialized hospitals as an independent building typology Whether constructed as part of Chinese palaces in the 15th century or the religious complexes in 16th century Ottoman Istanbul the healthcare facility throughout history is a built environment intended to promote healing and caring The essays in this volume address how the relationships between architectural forms associated with healthcare and other buildings in the pre modern era such as bathhouses almshouses schools and places of worship reflect changing attitudes towards healing They explore the impact of medical advances on the design of hospitals across various times and geographies and examine the historic construction processes and the stylistic connections between places of care and other building types and their development in urban context Deploying new methodological interdisciplinary and comparative approaches to the analysis of healthcare facilities *Health and Architecture* demonstrates how the spaces of healthcare themselves offer some of the most powerful and practical articulations of therapy The
