Presidents versus Senators F. The Press and the Presidential Honeymoon William James Hughes,1995

Devil's Bargains Hal Rothman,1998 The West is popularly perceived as America s last outpost of unfettered opportunity but twentieth century corporate tourism has transformed it into America s land of opportunism From Sun Valley to Santa Fe towns throughout the West have been turned over to outsiders and not just to those who visit and move on but to those who stay and control Although tourism has been a blessing for many bringing economic and cultural prosperity to communities without obvious means of support or allowing towns on the brink of extinction to renew themselves the costs on more intangible levels may be said to outweigh the benefits and be a devil s bargain in the making Hal Rothman examines the effect of twentieth century tourism on the West and exposes that industry s darker side He tells how tourism evolved from Grand Canyon rail trips to Sun Valley ski weekends and Disneyland vacations and how the post World War II boom in air travel and luxury hotels capitalized on a surge in discretionary income for many Americans combined with newfound leisure

time From major destinations like Las Vegas to revitalized towns like Aspen and Moab Rothman reveals how the introduction of tourism into a community may seem innocuous but residents gradually realize as they seek to preserve the authenticity of their communities that decision making power has subtly shifted from the community itself to the newly arrived corporate financiers And because tourism often results in a redistribution of wealth and power to outsiders observes Rothman it represents a new form of colonialism for the region By depicting the nature of tourism in the American West through true stories of places and individuals that have felt its grasp Rothman doesn't just document the effects of tourism but provides us with an enlightened explanation of the shape these changes take Deftly balancing historical perspective with an eye for what's happening in the region right now his book sets new standards for the study of tourism and is one that no citizen of the West whose life is touched by that industry can afford to ignore American Decades Richard Layman, Vincent Tompkins, 1994 Examines the changes in American civilization from the beginning of the twentieth century to the present

The Best Books for Academic Libraries: History of the Americas, 2002 Books recommended for undergraduate and college libraries listed by Library of Congress Classification Numbers *The Publishers Weekly*, 1997 American Skin Leon E. Wynter, 2002 Race has always been America's first standard and central paradox From the start America based its politics on the principle of white supremacy but it has always lived and dreamed of itself in color The truth beneath the contradiction has finally emerged and led us to the threshold of a transformation of American identity as profound as slavery was defining We live in a country where the King of Pop was born black and a leading rap MC is white where salsa outsells ketchup and cosmetics firms advertise blond hair dye with black models Whiteness is in steep decline as the primary measure of Americanness The new true American identity rising in its place is transracial defined by shared cultural and consumer habits not skin color or ethnicity And this unprecedented redefinition of what American sounds looks and feels like is not being driven by the politics of protest or liberal multiculturalism but by a more basic American instinct the profit motive Smart marketers discovered that the inherent subversive appeal of transracial American culture was the perfect boombox for breaking through the noise of a crowded marketplace Nike and the NBA used unambiguous black style to create modern sports marketing Pepsi validated Michael Jackson as a superstar while adding millions to its own bottom line Hollywood turned a taboo into a lucrative cliché with black white buddy films Oprah Winfrey created the model for the ultimate individual corporate brand and Budweiser created a signature series of commercials built around four ordinary black men signaling something ineffably American with one word Wassup In the end this is a hopeful but clear-eyed argument that while we fall short of true equality we are opting to carry on that struggle together within a common American cultural skin There's been a radical shift in the place of race and ethnicity in America Near revolutionary developments in advertising media marketing technology and global trade have in the last two decades of the twentieth century nearly obliterated walls that have stood for generations between nonwhites and the image of the American dream The mainstream heretofore synonymous with what is

considered average for whites is now equally defined by the preferences presence and perspectives of people of color The much maligned melting pot into which generations of European American identities are said to have dissolved is bubbling again but on a higher flame this time whiteness itself is finally being dissolved into a larger American identity On its surface this book tells the story of how and why big business turned up that flame and a brief history of race and pop culture leading up to this watershed But at its core American Skin is about the revolution that higher heat on American identity is bringing about the end of white America This book begins and my arguments and insights ultimately rest on one premise and guiding belief about this country We have always been and will ever be of one race human and of one culture American From the

Market Joshua Alexander Shannon, 2003 **Sidelines Activist** Richard Robbins, 1996 Although Charles S Johnson 1893 1956 called himself a sidelines activist his advocacy for racial equality was never watered down or half hearted His strategy was to work indirectly sometimes behind the scenes to influence public policy and to mobilize groups with special concerns for the tragic plight of rural black sharecroppers In coalition with an embattled band of southern white liberals he pressed the federal government to end lynching the poll tax separate but equal schooling and other racial inequities of the Jim Crow era Throughout his career he played the vital role of building bridges between the races specifically in gaining white philanthropic support in conducting sociological research and in stimulating activism in the black community This is the first full length biography of Johnson Together with W E B Du Bois and E Franklin Frazier he has been defined as a founding father among contemporary black sociologists His career as a professional sociologist was only one aspect of a many sided life which took him from the small town of Bristol in southwest Virginia into the greater world of crisis and conflict In Chicago he conducted landmark research on the devastating race riot there in 1919 In Harlem in the twenties he directed research for the Urban League edited its journal Opportunity and functioned as entrepreneur of the Harlem Renaissance

Mid-America, 1994 Modernism's Masculine Subjects Marcia Brennan, 2004 In the era of *The Man in the Gray Flannel Suit* when social pressures on men to conform threatened cherished notions of masculine vitality freedom and authenticity modernist paintings came to be seen as metaphorical embodiments of both idealized and highly conflicted conceptions of masculine selfhood In *Modernism's Masculine Subjects* Marcia Brennan traces the formalist critical discourses in which work by such artists as Henri Matisse Willem de Kooning and Jackson Pollock could stand as symbolic representations that at once challenged and reproduced such prevailing cultural conceptions of masculinity Rejecting the typical view of formalism's exclusive engagement with essentialized and purified notions of abstraction and its disengagement from issues of gender and embodiment Brennan explores the ways in which these categories were intertwined historically and theoretically Brennan makes new use of writings by Clement Greenberg and other powerful critics describing the works *Passionate Politics* Ralph J. Poole, Ilka Saal, 2008 This new collection of essays on American stage and film melodrama assesses the multifarious and contradictory uses to which melodrama has been put in American culture from the late 18th century to the present It focuses on the various ways in which the genre has periodically intervened in debates over race class gender and sexuality and in this manner has also persistently contributed to the formation and transformation of American nationhood from the debates over who constitutes the newborn nation in the Early Republic to the subsequent conflict over abolition and the discussion of gender roles at the turn of the 19th century to the fervent class struggles of the 1930s and the critiques of domestic containment in the 1950s as well as to ongoing debates of gender race and sexuality today Addressing these issues from a variety of different angles including historical aesthetic cultural phenomenological and psychological approaches these essays present a complex picture of the cultural work and passionate politics accomplished by melodrama over the course of the past two centuries particularly at times of profound social change Hodges' Harbrace Handbook Robert Miller, Suzanne Webb, Winifred Horner, 2000-08
