Silicon Valley: Planet Startup Peter Ester, Arne Maas, 2025-10-01 For decades now Silicon Valley has been the home of the future. It's the birthplace of the world's most successful high-tech companies including Apple, Yahoo, Google, Facebook, Twitter, and many more. So what's the secret? What is it about Silicon Valley that fosters entrepreneurship and innovation? With *Silicon Valley: Planet Startup*, Peter Ester and Arne Maas argue that the answer lies in Silicon Valley's culture: a corporate culture that values risk-taking, creativity, invention, and sharing. Through extensive interviews with Dutch entrepreneurs working in the area, Ester and Maas show that Silicon Valley is, above all, a mind-set: a belief in thinking with passion and ambition far beyond the here and now. The New Patriarchs of Digital Capitalism Ben Little, Alison Winch, 2021-06-23 This book offers an original critique of the billionaire founders of US West Coast tech companies, addressing their collective power, influence, and ideology, their group dynamics, and the role they play in the wider sociocultural and political formations of digital capitalism. Interrogating not only the founders' political and

economic ambitions but also how their corporations are omnipresent in our everyday lives the authors provide robust evidence that a specific kind of patriarchal power has emerged as digital capitalism's mode of command The New Patriarchs examined over the course of the book include Sergey Brin and Larry Page of Google Elon Musk of Tesla Jeff Bezos of Amazon Mark Zuckerberg of Facebook and Peter Thiel We also include Sheryl Sandberg The book analyses how these mostly men legitimate their rapidly acquired power tying a novel kind of socially awkward but visionary masculinity to exotic forms of shareholding Drawing on a ten million word digital concordance the authors intervene in feminist debates on patriarchy masculinity and postfeminism locating the power of the founders as emanating from a specifically racialised structure of oppression tied to imaginaries of the American frontier the patriarchal household and settler colonialism This is an important interdisciplinary contribution suitable for researchers and students across Digital Media Media and Communication and Gender and Cultural Studies

Minnesota Law Review, 2015 [Tech](#) Olivier Alexandre, 2025-09-23 The first holistic analysis of the space mindset and inner workings of Silicon Valley in a generation Sometimes only an outsider can show how an industry works and how that industry works upon the world In Tech sociologist Olivier Alexandre takes us on a

revealing tour of Silicon Valley's prominent personalities and vibrant networks to capture the way its denizens live, think, relate, and innovate and how they shape the very code and conduct of business itself. Even seasoned observers will gain insight into the industry's singular milieu from Alexandre's piercing eye. He spends as much time with Silicon Valley's major players as with those who fight daily to survive within a system engineered for disruption. Embedded deep within the community, Alexandre accesses rooms shut tight to the public and reports back on the motivations, ambitions, and radical vision guiding tech companies. From the conquest of space to quantum computing, engineers have recast the infinitely large and small. Some scientists predict the end of death and the replacement of human beings with machines. But at what cost? Alexandre sees a shadow hanging over the Valley, jeopardizing its future and the economy made in its image. Critical yet fair, Tech illuminates anew a world of perpetual revolution.

AI Explains: Y Combinator Alexis Piani, 2025-06-01

Before the mid 2000s, the path for early stage entrepreneurs was often a solitary, arduous journey. Finding seed funding was fragmented and difficult, relying heavily on personal networks or risky credit cards. There was no standardized playbook, no concentrated hub of knowledge, and limited access to experienced mentors. Many promising ideas and talented founders struggled in isolation, burning out before they could find their footing. This challenging landscape was ripe for disruption, and in 2005, a small group of visionaries—Paul Graham, Jessica Livingston, Robert Tappan Morris, and Trevor Blackwell—dared to imagine a better way. They conceived of Y Combinator, a revolutionary experiment designed to systematically identify, fund, and accelerate the very earliest stages of startup creation, fundamentally altering the trajectory for ambitious builders worldwide. This book delves into the core of the YC phenomenon, exploring how this initial experiment evolved into the world's premier startup accelerator. We go inside the YC machine, examining the rigorous selection process that identifies exceptional founders, the intense three-month program that pushes teams to build relentlessly and find product-market fit, and the pivotal Demo Day that connects them directly with the global investor ecosystem. You'll discover the strategic structure of YC's funding, including the now-standard \$125,000 for 7% deal, and learn how YC's innovative Simple Agreement for Future Equity (SAFE) mechanism revolutionized early stage financing, simplifying and accelerating deals for countless startups worldwide. Beyond the program itself, the book reveals the enduring power of the YC alumni network, a vibrant community of over 5,000 companies, including giants like Airbnb, Stripe, and Reddit, that provides lifelong support, collaboration, and opportunities. We trace YC's historical milestones from its dual-city origins and consolidation in Silicon Valley to its expansion into global markets and adaptation to remote batches, showcasing its resilience and forward-thinking approach. Furthermore, we explore YC's ventures into long-term research through YC Research, funding ambitious projects like OpenAI and basic income studies, demonstrating a commitment to shaping the

future of technology and society itself This book is an essential guide for aspiring founders seeking to understand the blueprint for accelerated growth investors looking to navigate the early stage landscape and anyone interested in the forces that have shaped the modern startup ecosystem It offers an honest in depth look at how YC became a transformative force and what its continued evolution means for the future of innovation **Startup** Jerry Kaplan,1995 **Y Combinator** ,2014 Get an inside look at one of Silicon Valley s most successful incubators Y combinator Companies like Heyzap Airbnb Hipmunk Reddit and Dropbox are all very different but have one mighty factor in common they got their initial green and kibitz from Y combinator The Commonwealth Club of California is the nation s oldest and largest public affairs forum bringing together its members for events on topics ranging across politics culture society and the economy **Summary: Secrets of Silicon Valley** BusinessNews Publishing,2014-11-12 The must read summary of Deborah Perry Piscione s book Secrets of Silicon Valley What Everyone Else Can Learn from the Innovation Capital of the World This complete summary of the ideas from Deborah Perry Piscione s book Secrets of Silicon Valley shows how we can all learn something from the world s most prosperous and successful group of companies In this book the author gives us an insight into the Silicon Valley ecosystem and highlights the 10 features that are the keys to its success By reading this summary and understanding the actions at the heart of these world class companies you can adapt their processes to suit your own company and start climbing to the top Added value of this summary Save time Understand key concepts Expand your business knowledge To learn more read Secrets of Silicon Valley and find out the keys to success that the world s best companies have been hiding **Startup** Jerry Kaplan,1996-10-01 Kaplan a well known figure in the computer industry founded GO Corporation in 1987 and for several years it was one of the hottest new ventures in the Valley Startup tells the story of Kaplan s wild ride how he assembled a brilliant but fractious team of engineers software designers and investors pioneered the emerging market for hand held computers operated with a pen instead of a keyboard and careened from crisis to crisis without ever losing his passion for a revolutionary idea Along the way Kaplan vividly recreates his encounters with eccentric employees risk addicted venture capitalists and industry giants such as Bill Gates John Sculley and Mitchell Kapor And no one including Kaplan himself is spared his sharp wit and observant eye **The Silicon Valley Edge** Chong-Moon Lee,2000 Academic and industry leaders of Silicon Valley offer a behind the scenes look at what accounts for the region s leading edge in innovation and entrepreneurship They reveal how universities venture capitalists headhunters and others have come together to create the habitat of the Silicon Valley an environment that fosters the development of new firms new industries and unparalleled wealth Lee is chairman and CEO of AmBex Venture Group Annotation copyrighted by Book News Inc Portland OR *Arc of the Valley* Anton Commissaris,2021-04-02 Personal finance startup Mint was a poster child for overnight success in the Valley s web 2 0 era Led by a driven young founder and built on technology created in his apartment Mint assembled a hungry talented and diverse team and raisedmillions from the biggest names in venture capital It grew fast even through the
