

Introduction to The Middle Ages by David Adams Leeming

1066-1485

At his most characteristic, medieval man was not a dreamer nor a wanderer. He was an organizer, a codifier, a builder of systems. He wanted "a place for everything and everything in the right place." Distinction, definition, and tabulation were his delight. Though full of turbulent activities, he was equally full of the impulse to formalize them. Was (in intention) formalized by the art of heraldry and the rules of chivalry; sexual passion (in intention), by the elaborate code of love. . . . There was nothing which medieval people liked better, or did better, than sorting out and tidying up. Of all our modern inventions I suspect that they would most have admired the card index.

—C. S. Lewis

In October 1066, a daylong battle near Hastings, England, changed the course of history. There, just ten miles from the channel dividing England from France, Duke William of Normandy, France, defeated and killed King Harold of England, the last of the Anglo-Saxon kings. So began the Norman Conquest, an event that radically affected English history, the English character, and the English language. Unlike the Romans, the Normans never withdrew from England.

Who was this William the Conqueror? He was the illegitimate son of the previous duke of Normandy, who was in turn a cousin of the English king called Edward the Confessor. Edward had died childless earlier in 1066, and Harold, the earl of Wessex, had been crowned the following day. But William claimed that the old king had promised the throne to him. Determined to seize what he considered rightfully his, William sailed the English Channel with an enormous army.
