Intelligent Production and Manufacturing Optimisation—The Bees Algorithm Approach Duc Truong Pham, Natalia Hartono, 2022-11-19 This book is the first work dedicated to the Bees Algorithm Following a gentle introduction to the main ideas underpinning the algorithm the book presents recent results and developments relating to the algorithm and its application to optimisation problems in production and manufacturing With the advent of the Fourth Industrial Revolution production and manufacturing processes and systems have become more

complex To obtain the best performance from them requires efficient and effective optimisation techniques that do not depend on the availability of process or system models Such models are usually either not obtainable or mathematically intractable due to the high degrees of nonlinearities and uncertainties in the processes and systems to be represented The Bees Algorithm is a powerful swarm based intelligent optimisation metaheuristic inspired by the foraging behaviour of honeybees The algorithm is conceptually elegant and extremely easy to apply All it needs to solve an optimisation problem is a means to evaluate the quality of potential solutions This book demonstrates the simplicity effectiveness and versatility of the algorithm and encourages its further adoption by engineers and researchers across the world to realise smart and sustainable manufacturing and production in the age of Industry 4 0 and beyond

Disability and Video Games Markus Spöhrer, Beate Ochsner, 2023-12-18 This collection intends to fill a long overdue research gap on the praxeological aspects of the relationships between disabilities accessibility and digital gaming It will focus on the question of how Game Studies can profit from a Disability Studies perspective of enabling gaming and issues of disability in accessibility and ableism and vice versa Instead of departing from the medical model of disability that informs a wide range of publications on disabled gaming and that preconceives users as either able bodied normal or as disabled deficit or unable to play our central premise is that disability is not an essential characteristic of the playing subject We rather intend to analyze the complex infrastructures of playing i e the complex interplay of heterogeneous human and non human actors that are enabling or disabling
