answers to the nation's growing concerns about educational testing in America. Drawing on research and the experiences of leading states and countries, this new book examines how performance assessments can offer a feasible alternative to current high-stakes tests. As parents, educators, and policymakers have increasingly criticized the effects of the teaching to the test mandate from the No Child Left Behind Act, the need for this resource has never been more critical. This summary volume to *Beyond the Bubble Test* speaks to the nationwide unease about current tests' focus on low-level skills like recalling and restating facts rather than higher-order skills such as problem solving, analyzing, and synthesizing information. It illustrates how schools can use authentic assessments to improve teaching and learning as they involve students in conducting research, designing investigations, developing products and solutions using technology, and communicating their ideas in many forms. This important book serves as a must-have resource for those interested in the most current research about how to create valid and reliable performance assessments. Explains how educators can improve practice by developing, using, and scoring performance assessments. Helps policymakers and educators accurately assess the benefits and possibilities of adopting performance assessments nationally. If you're an educator, researcher, graduate student, district administrator, or education policy specialist, *Next Generation Assessment* is an indispensable resource you'll turn to again and again.

Aligning Your Curriculum to the Common Core State Standards Joe Crawford, 2012. Avoid analysis paralysis and just get started. Now that most states have adopted the new Common Core State Standards, the next major challenge is to simplify and implement them by 2014. That is why it is important to begin this work now. Joe Crawford, Milken Award-winning educator and author of *Using Power Standards to Build an Aligned Curriculum*, shares his proven process for building a viable local curriculum based on the CCSS. Readers will find a system for creating local standards from the CCSS, methods for connecting the common formative assessments to quarterly instructional objectives, ways to scaffold learning expectations, examples taken from districts where CCSS is currently implemented. Included are helpful charts and graphs plus access to Internet-based software for mapping the CCSS to curriculum, instruction, and assessment. Schools cannot continue to do what they have always done and expect a different result. This book explains how to facilitate learning for all students while taking advantage of the new culture, technology, and norms of today's learning environment.

Beyond the Bubble Test Linda Darling-Hammond, Frank Adamson, 2014-06-16. Performance assessment is a hot topic in school systems and educators continue to analyze its costs, benefits, and feasibility as a replacement for high-stakes testing. Until now, researchers and policymakers have had to dig to find out what we know and what we still have to learn about performance assessment. *Beyond the Bubble Test: How Performance Assessments Support 21st Century Learning* synthesizes the latest findings in the field and not a moment too soon. Statistics indicate that the United States is in danger of falling behind if it fails to adapt to our changing world. The memory and recall strategies of traditional testing are no longer adequate to equip our students with the skills they need to excel in the global economy. Instead, teachers need to engage students in deeper learning, assessing their ability to use higher

order skills Skills like synthesizing information understanding evidence and critical problem solving are not achieved when we teach to multiple choice exams Examples in *Beyond the Bubble Test* paint a useful picture of how schools can begin to supplement traditional tests with something that works better This book provides new perspectives on current performance assessment research plus an incisive look at what's possible at the local and state levels Linda Darling Hammond with a team of leading scholars bring together lessons learned new directions and solid recommendations into a single readily accessible compendium *Beyond the Bubble Test* situates the current debate on performance assessment within the context of testing in the United States This comprehensive resource also looks beyond our U S borders to Singapore Hong Kong and other places whose reform mindedness can serve as an example to us
