Recent Advances in Gestational Diabetes Mellitus Guoju Li,Zhanhui Du ,Yanhui Lu,2024-06-24 Gestational diabetes mellitus is one of the most common pregnancy related complications Gestational diabetes mellitus poses a significant threat to maternal health and offspring development including shoulder dystocia preterm birth maternal hypertension and ischemic heart disease constituting a major public health crisis Given the serious adverse outcomes of gestational diabetes mellitus there is an urgent need to further explore new prediction tools of early pregnancy The exact reasons for the development of gestational diabetes mellitus remain inconclusive Pathological mechanisms underlying gestational diabetes mellitus have been mainly attributed to cell impairment However the underlying mechanisms of gestational diabetes mellitus have not been elucidated In identifying risk factors and biomarkers in early pregnancy can provide more basis for clinical diagnosis of gestational diabetes mellitus in the future **Plastics in Dentistry and Estrogenicity** Theodore Eliades,George Eliades,2013-11-22 This book provides a timely and comprehensive review of our current knowledge of BPA release from dental polymers and the potential endocrinological consequences After a review of the history and evolution of the issue within the broader biomedical context the estrogenicity of BPA is explained The basic chemistry of the polymers used in dentistry is then presented in a simplified and clinically relevant manner Key chapters in the book carefully evaluate the release of BPA from polycarbonate products and composite resins and the estrogenicity of these materials Currently available

evidence on the potential estrogenic action of dental composites sealants and adhesives is presented and means are suggested by which adverse health effects can be minimized The entire dental community will find this book to be an excellent source of information on the true risks posed by BPA and an invaluable aid to safe practice Alcohol and Its Biomarkers Amitava Dasgupta,2015-02-18 Alcohol and Its Biomarkers Clinical Aspects and Laboratory Determination is a concise guide to all currently known alcohol biomarkers their clinical application and the laboratory methods used to detect them Pathologists can use this resource to understand the limitations and cost factors associated with each method for determining certain alcohol biomarkers In addition interferences in these determinations are discussed so that clinicians can understand the causes of falsely elevated biomarkers and pathologists and laboratory scientists can potentially eliminate them The book focuses on the analytical methods used to detect alcohol in blood and urine the limitations of alcohol determination using enzymatic methods and the differences between clinical and forensic alcohol measurement Chapters also cover cutting edge alcohol biomarkers for potential use Focuses on the analytical methods used for detecting alcohol in blood and urine along with the pitfalls and limitations of alcohol determination using enzymatic methods Explains the difference between clinical and forensic alcohol measurement Includes a brief overview of the benefits of consuming alcohol in moderation and the hazards of heavy drinking *Pediatric Obesity: From the Spectrum of Clinical-Physiology, Social-Psychology, and Translational Research* Ching-Feng Cheng,Yen-Hsuan Ni,2021-11-23 **Index Medicus** ,2001

Accurate Results in the Clinical Laboratory Amitava Dasgupta,Jorge L. Sepulveda,2019-07-20 Accurate Results in the Clinical Laboratory A Guide to Error Detection and Correction Second Edition provides a comprehensive review of the factors leading to errors in all areas of clinical laboratory testing This trusted guide addresses interference issues in all laboratory tests including patient epigenetics processes of specimen collection enzymes and biomarkers Clinicians and laboratory scientists will both benefit from this reference that applies discussions to both accurate specimen analysis and optimal patient care Hence this is the perfect reference for clinical laboratorians from trainees to experienced pathologists and directors Provides comprehensive coverage across endocrine oncology hematology immunohistochemistry immunology serology microbiology and molecular testing Includes new case studies that highlight clinical relevance and errors to avoid Highlights the best titles published within a variety of medical specialties Reviewed by medical librarians and content specialists with key selections compiled in their annual list **Nutrients in the Control of Metabolic Diseases** A. P. Simopoulos,1992-09-22 Dietary Habits in Liver Health and Disease: Preclinical and Clinical Studies Evelyn Nunes Goulart Da Silva Pereira,Caroline Fernandes-Santos,Lubomir Skladany,2025-09-23 The liver is a very complex organ that performs several vital functions many of which cannot yet be replaced by the most advanced therapeutic technologies Liver health and nutrition are closely linked and the relationship between dietary intake and liver disease has been studied in recent years Despite its importance in the development and severity of many medical problems not enough attention has been paid to

nutrition Nutrition plays an important role not only in the etiology but also in the pathogenesis of liver diseases While an extreme nutritional state malnutrition or obesity can lead to liver dysfunction a dysfunctional liver can lead to changes in the metabolism of macro and micronutrients Animal and human evidence support the harmful effects of consuming higher fat high carbohydrate diets which can lead to liver dysfunction that affects overall health Conversely nutritional therapy plays an important role in the treatment of liver disease

Novel insights into the pathophysiology of diabetesrelated complications: implications for improved therapeutic strategies, volume II Jian Ma, Chunjie Jiang, Xuebin Fu, 2025-04-30 Given that Volume I of the topic Novel Insights into the Pathophysiology of Diabetes related Complications Implications for Improved Therapeutic Strategies has been successfully performed last year and we have received submissions talking about diabetic retinopathy DR diabetic neuropathy DN type 2 diabetes mellitus T2DM associated periodontitis diabetic oxidative liver damage diabetic related wound healing etc We are pleased to announce the launch of Volume II Diabetes mellitus DM as a major health problem has been highly prevalent across the globe It is increasingly apparent that not only a cure for the current worldwide diabetes epidemic is required but also a cure for its major complications including heart disease chronic kidney disease and nerve damage In addition other problems with feet oral health vision hearing reproduction and mental health need to be explored as well Understanding the underlying mechanisms of these diabetic complications would be helpful to prevent or delay the occurrence of complications and to improve the overall health condition of people with DM Unfortunately current therapies only slow down disease deterioration of most prevalent diabetic complications Indeed whether the mechanisms in diabetic complications are protective or pathological remains not fully defined based on the impacts during the underlying disease process Thus we welcome academic articles that can provide the latest insights into the pathophysiology of diabetes related complications These submissions range from uncovering the intracellular signaling pathways with the development of diabetic complications to exploring the possible role of genetic issues metabolic regulation and inflammation mechanisms We welcome high quality Original Research and Review articles that contribute to the mechanism investigation of a range of diabetic complications including but not limited to Microvascular damage related diseases in diabetic patients such as neuropathy nephropathy and retinopathy Foot damage and skin problems in diabetes Reproductive disorder in diabetic women The relationship between diabetes and the development of Alzheimer s disease depression and cognitive impairment In this continued Volume II we are looking forward to seeing many more academic articles on DM related heart disease a reproductive disorder in diabetic women or the relationship between diabetes and the development of Alzheimer s disease etc Also Methods articles that introduce novel experimental methods or animal models that contribute to understanding the formation and progress of diabetic complications are continually welcome Opinions or Perspectives regarding the implications of new research on the treatment of diabetic complications are encouraged too

Cardiovascular Diseases Related to Diabetes and Obesity, volume III Lu Cai, Ying Xin, Jamie Lynn Young, Rajesh Mohanraj, 2024-02-20
