,2013-08-01 Introduction to Meteorology and Astronomy Course Description This is the suggested course sequence that allows one core area of science to be studied per semester You can change the sequence of the semesters per the needs or interests of your student materials for each semester are independent of one another to allow flexibility Semester 1 Meteorology The Earth was created to be the dwelling place of man It is a complex world and its weather patterns affect our lives every day Whether you live near the equator a polar region or somewhere in between knowledge of the weather is important The Weather Book will teach you why our exact distance from the sun allows life on earth how the weather on the other side of the earth affects you how clouds form and how to identify the different types what the difference is between a cold and warm front why you can often see lightning long before you can hear thunder how to build your own weather station how to survive in dangerous weather what the greenhouse effect and the ozone hole are what Noah s flood and the Ice Age have in common how weatherpersons forecast hurricanes and tornadoes how to read a weather map and what our responsibility is to the environment Learning about the weather is fun It will change the way you look at the clouds in the sky Now you ll have more of an understanding about what is going on miles above your head And when you hear a weather report on television you will understand so much more about the world around you Semester 2 Astronomy One thing we have in common with the ancients is that all of the human race has gazed at the night sky and the bright morning and wondered What s out there Our universe is so vast and awe inspiring that to learn about it is to learn about ourselves The Astronomy Book will teach you what long ago astronomers thought about other worlds solar system facts how constellations relate to astrology the history of space exploration black holes do they exist the origin and age of the moon why Mars doesn t support life the composition of stars supernova remnants and the myth of star birth asteroid legends and the extinction of the dinosaurs are there planets outside our solar system and could they be home to intelligent life what are UFOs and the age of comets and meteor showers Learning about the universe is huge fun In the almost infinite expanse above us we can examine planets galaxies and phenomena so beautiful and complex that we never outgrow a childlike wonder We see our own reflection in the moon the stars and in comet trails The more we learn the less we fear **Astronomy Demystified** Stan Gibilisco,2002-08-23 THE FAST AND PAINLESS WAY TO GRASP THE FUNDAMENTALS OF BASIC ASTRONOMY WITHOUT FORMAL TRAINING Want to master astronomy or aerospace engineering but are intimidated by the complex formulas and equations Tried other self teaching guides but were turned off by the dry complicated presentation Problem solved Astronomy Demystified is a totally different very entertaining and amazingly effective way to learn the mathematics fundamentals and general concepts of astronomy With Astronomy Demystified you ease into the subject one simple step at a time at your own speed Unlike most other books on the topic general concepts are presented first and the details follow In order to make the learning process as clear and simple as possible heavy duty math formulas and equations are kept at a minimum THIS UNIQUE SELF TEACHING TEXT OFFERS Questions at the end of every chapter and section to reinforce

learning and pinpoint your weaknesses A 100 question final exam for self assessment Tips on how to get the most out of observational tools such as binoculars and telescopes Discussion of the special problems associated with observing the sky at invisible wavelengths An easy way to understand the math involved in astronomy Simple enough for a beginner but comprehensive enough for an advanced student Astronomy Demystified is your short cut to understanding the heavens
