Wight, 2012-12-06. Needle biopsy of the liver is

now an accepted procedure in most large hospitals and surgeons and laparoscopists are more likely to biopsy the liver under direct vision than in the past. Consequently increasing demands are being made on pathologists for rapid diagnosis. This full colour atlas provides a practical guide to the histopathological diagnosis of liver disorders with particular emphasis on clinicopathological correlation and the need for the pathologist to be in full possession of all the available clinical information. Although containing over 350 colour illustrations the book is more than just an atlas and each section includes a brief description of the main clinical and pathological features of the subject under discussion. For this second edition many chapters have been rewritten e.g. on viral hepatitis and many new illustrations added. The book is intended for the practising and trainee pathologist and the clinician who performs liver biopsies but will also be of value to postgraduates, residents and students in other branches of medicine.

Endocrine Toxicology C. K. Atterwill, J. D. Flack, 1992-04-09. This is the first book to deal comprehensively with endocrine toxicology. It covers the whole spectrum of known toxicant effects on the endocrine system ranging from small disturbances in hormonal secretion to full endocrine neoplasia. In each chapter internationally recognised authorities have addressed basic endocrine physiology, current techniques for studying endocrine toxicity in vivo and in vitro, known xenobiotic induced toxicity phenomena and the latest scientific advances in understanding the underlying molecular and cellular events. Consideration is given to important issues such as dietary factors which influence endocrine toxicity, species differences in sensitivity to toxicants and the toxicity of hormones and drugs. The volume provides a sound basis for understanding the scientific aspects of this complex and important area of toxicology and will be a useful source of information for all those working in this field.
