Adult Interactive Style Intervention and Participatory Research Designs in Autism Lila Kossovaki, 2017-09-13 Regardless of their cognitive and linguistic abilities people with autism can often find it difficult to develop basic communicative skills that are necessary to gain full control over their environment and maintain their independence Building on the author's own cutting edge research Adult Interactive Style Intervention and Participatory Research Designs in Autism examines the impact that the interactive style of neurotypical individuals could have on the spontaneous communication of children with autism This book provides clear and detailed guidance on how to conduct research into autism in real world settings such as schools and homes Kossovaki critically evaluates a wealth of relevant case studies and focuses on a number of methodological issues that researchers are likely to face when carrying out research of this complex nature The author walks the reader through present literature on the importance of spontaneous communication and the atypical way that this tends to develop in autism before bringing the results of her own research to bear on the question of how the interactive styles of neurotypical individuals can impact on the spontaneous communication of people with autism Adult Interactive Style Intervention and Participatory Research Designs in Autism is essential reading for academics researchers and postgraduate students in the fields of special educational needs inclusion autism research methods and educational and clinical psychology

Educating Students with Autism Spectrum Disorders Dianne Berkell Zager, Michael L. Wehmeyer, Richard L. Simpson, 2012 Similar to a handbook in its comprehensive description of the theory and research supporting current practices in the treatment of autism spectrum disorders this interdisciplinary text shows how the existing knowledge base can be used to explore promising new possibilities related to the field's many unanswered questions Key features include the following Comprehensive e This is the first book to consider the history and current state of autism as a field in transition to cover its varied approaches and philosophies and to describe the interventions used throughout the developmental cycle Cross Disciplinary e Serving students with autism necessitates communication and collaboration among professionals from several disciplines as well as family members The editors have therefore brought together divergent perspectives theories and philosophies in order to demonstrate that scientific evidence rather than educational orientation must determine which practices should be selected for use in particular situations Research Based e Whereas many existing texts advocate a particular type of treatment this one recognizes that interventions must be selected and evaluated based on the scientific evidence of their effectiveness Integrated Methodology e Chapter authors consider findings from studies that employed single subject designs experimental

large scale studies and qualitative methodology The inter relatedness of therapies and disciplines will be highlighted throughout Expertise e The volume editors are all highly visible researchers in autism and developmental disabilities Likewise each chapter is directed by a senior highly accomplished author who is nationally recognized for his her work in the topic being addressed This book is appropriate for practicing professionals in education and psychology and for speech language therapists and other clinicians It is also suitable as a graduate level text in these fields

The Handbook of Child and Adolescent Clinical Psychology Alan Carr, 2025-06-02 Now in its fourth edition The Handbook of Child and Adolescent Clinical Psychology incorporates important advances in the field to provide a practice oriented and accessible resource for clinical psychologists in training Beginning with a set of general conceptual frameworks for practice the book gives specific guidance on the management of problems commonly encountered in clinical work with children and adolescents drawing on the best practice in the fields of clinical psychology and family therapy There is comprehensive coverage of Problems of infancy and early childhood Problems of middle childhood Problems of adolescence Child abuse Adjustment to major life transitions including entering foster care parental divorce and bereavement Each chapter dealing with specific clinical problems includes cases examples discussion of diagnosis classification epidemiology clinical features assessment and treatment and practice exercises New material includes the latest advances in child and adolescent clinical psychology assessment and treatment programmes and positive psychology It also is updated in line with the latest revisions of ICD and DSM This book is invaluable as both a reference work for experienced practitioners and as an up to date evidence based practice manual for clinical psychologists in training
