The Untold Story of the Talking Book Matthew Rubery, 2023-01-18 A history of audiobooks from entertainment rehabilitation for blinded World War I soldiers to a twenty-first century competitive industry. Histories of the book often move straight from the codex to the digital screen. Left out of that familiar account are nearly 150 years of audio recordings. Recounting the fascinating history of audio recorded literature.

Matthew Rubery traces the path of innovation from Edison's recitation of Mary Had a Little Lamb for his tinfoil phonograph in 1877 to the first novel length talking books made for blinded World War I veterans to today's billion dollar audiobook industry. *The Untold Story of the Talking Book* focuses on the social impact of audiobooks not just the technological history in telling a story of surprising and impassioned conflicts from controversies over which books the Library of Congress selected to become talking books yes to Kipling no to Flaubert to debates about what defines a reader. Delving into the vexed relationship between spoken and printed texts Rubery argues that storytelling can be just as engaging with the ears as with the eyes and that audiobooks deserve to be taken seriously. They are not mere derivatives of printed books but their own form of entertainment. We have come a long way from the era of sound recorded on wax cylinders when people imagined one day hearing entire novels on mini phonographs tucked inside their hats. Rubery tells the untold story of this incredible evolution and in doing so breaks from convention by treating audiobooks as a distinctively modern art form that has profoundly influenced the way we read. Praise for *The Untold Story of the Talking Book* If audiobooks are relatively new to your world you might wonder where they came from and where they're going. And for general fans of the intersection of culture and technology *The Untold Story of the Talking Book* is a fascinating read. Neil Steinberg Chicago Sun Times Rubery explores 150 years of the audio format with an imminently accessible style touching upon a wide range of interconnected topics. Through careful investigation of the co-development of formats within the publishing industry Rubery shines a light on overlooked pioneers of audio. Rubery's work succeeds in providing evidence to move beyond the reductive debate on whether audiobooks really count as reading and establishes the format's rightful place in the literary family. Neuroplasticity Moheb Costandi, 2016-08-16 The real story of how our brains and nervous systems change throughout our lifetimes with or without brain training. Fifty years ago neuroscientists thought that a mature brain was fixed like a fly in amber unable to change. Today we know that our brains and nervous systems change throughout our lifetimes. This concept of neuroplasticity has captured the imagination of a public eager for self-improvement and has inspired countless Internet entrepreneurs who peddle dubious brain training games and apps. In this book Moheb Costandi offers a concise and engaging overview of neuroplasticity for the general reader describing how our brains change continuously in response to our actions and experiences. Costandi discusses key experimental findings and describes how our thinking about the brain has evolved over time. He explains how the brain changes during development and the synaptic pruning that takes place before brain maturity. He shows that adult brains can grow new cells citing among many other studies research showing that sexually mature male canaries learn a new song every year. He describes the kind of brain training that can bring about improvement in brain function. It's not gadgets and games that promise to rewire your brain but such sustained cognitive tasks as learning a musical instrument or a new language. Costandi also notes that London cabbies increase their gray matter after rigorous training in their city's complicated streets. He tells how brains compensate after stroke or injury describes addiction and pain

as maladaptive forms of neuroplasticity and considers brain changes that accompany childhood adolescence parenthood and aging Each of our brains is custom built Neuroplasticity is at the heart of what makes us human

A New Hasidism: Roots Arthur Green, Ariel Evan Mayse, 2019-10-01. Neo Hasidism applies the Hasidic masters' spiritual insights of God's presence everywhere, of seeking the magnificent within the everyday, in doing all things with love and joy, uplifting all of life to become a vehicle of God's service to contemporary Judaism as practiced by men and women who do not live within the strictly bounded world of the Hasidic community. This first ever anthology of Neo Hasidic philosophy brings together the writings of its progenitors: five great twentieth-century European and American Jewish thinkers: Hillel Zeitlin, Martin Buber, Abraham Joshua Heschel, Shlomo Carlebach, and Zalman Schachter Shalomi, plus a young Arthur Green. The thinkers reflect on the inner life of the individual and their dreams of creating a Neo Hasidic spiritual community. The editors' introductions and notes analyze each thinker's contributions to Neo Hasidic thought and influence on the movement. Zeitlin and Buber initiated a renewal of Hasidism for the modern world; Heschel's work is quietly infused with Neo Hasidic thought; Carlebach and Schachter Shalomi re-created Neo Hasidism for American Jews in the 1960s, and Green is the first American-born Jewish thinker fully identified with the movement. Previously unpublished materials by Carlebach and Schachter Shalomi include an interview with Schachter Shalomi about his decision to leave Chabad Lubavitch and embark on his own Neo Hasidic path.
