Atelier Bow Wow A Primer:

Atelier Bow-Wow Atorie Wan,Laurent Stalder,2013 The Tokyo based architecture firm Atelier Bow Wow founded in 1992 by Yoshiharu Tsukamoto and Momoyo Kaijima is among the most admired architecture practices of today Part of a whole generation of Japanese firms that seized the recession of the early 1990s as an opportunity to develop a new design practice in response to changed planning and social conditions Atelier Bow Wow is well known for its domestic and cultural architecture as well as its research exploring micro architecture The firm s first studies focused on anonymous Tokyo buildings and highlighted the ways in which they met the requirements of residents and visitors Additionally founders Tsukamoto and Kaijima devised a particular type of residential building for Tokyo a small scale house that offers an ideal solution to the restrictions of the densely populated megacity This publication unifies Atelier Bow Wow s architectural and theoretical work

Participatory Design Theory Oswald Devisch,Liesbeth Huybrechts,Roel De Ridder,2018-10-03 In recent years many countries all over Europe have witnessed a demand for a more direct form of democracy ranging from improved clarity of information to being directly involved in decision making procedures Increasingly governments are putting citizen participation at the centre of their policy objectives striving for more transparency to engage and empower local individuals and communities to collaborate on public projects and to encourage self organization This book explores the role of participatory design in keeping these participatory processes public It addresses four specific lines of enquiry how can the use and or development of technologies and social media help to diversify to coproduce to interrupt and to document democratic design experiments Aimed at researchers and academics in the fields of urban planning and participatory design this book includes contributions from a range of experts across Europe including the UK Belgium the Netherlands Italy Denmark Austria Spain France Romania Hungary and Finland

Hypersexual City Nicole Kalms,2017-03-31 Much of feminist architectural scholarship focuses on the enormous task of instating women s experience of space into spatial praxis Hypersexual City The Provocation of Soft Core Urbanism suggests this attention to women s invisibility in sociocultural space has overlooked the complex ways in which women already occupy space albeit mostly as an image or object to be consumed even purchased It examines the occupation of urban space through the mediated representation of women s hypersexualized bodies A complex transaction proliferates in the commercial urban space of cities this book seeks to address the cause and consequence of the increasing dominance of gendered representation It uses architectural case studies and analysis to make visible the sexual politics of architecture and urbanism and in doing so reveal the ways that heterosexist culture shapes the spaces behaviour and relationships formed in neoliberal cities Hypersexual City announces how examining urbanism that operates through and is framed by sexual culture can demonstrate that architecture does not merely find itself adrift in the hypersexualized landscape of contemporary cities but is actively producing and contributing to the sexual regulation of urban life

Supertight Graham Crist,John Doyle,2021-12-27 Supertight is an exploration of high density urban life and reducing

the footprint of cities through adaptations in design and behavior Tightness is a positive urban quality examined through the observations of designers with a focus on the cities of Asia The rapidly growing large cities of Asia are critical to understanding our future footprint Asian cities provide insights into new ways of being densely urbanised The by product of this unprecedented metropolitan convergence will be the emergence of new urbanisms and new architectures new models for living and making culture The Supertight refers to the small intense robust and hyper condensed spaces that emerge as a by product of extreme levels of urban density Tightness arises as consequence of density but tightness itself is not density Tightness is a series of social economic and cultural practices that have developed in cities as a response to the rapid growth and consolidation of cities While architectural models of density have been heavily explored this project investigates the culture of tightness that has emerged in Asian cities over the past thirty years and the role that designers play in the material and social behaviours of tightness To be tight is to be small and constrained but also to be open to the economies and social intimacy of being close Ultimately this project aims to unpack and convey both the delight and difficulty that emerges through the close occupation of large cities With Contributions of Yoshiharu Tsukamoto Atelier Bow wow Atelierco Rafael A Balboa with Yasemin Sahiner Sanuki Daisuke Drawing Architecture Studio Desiree Grunewald Sue Hajdu Tohru Horiguchi Alban Mannisi Yazid Ninsalam Charles Anderson Minsuk Cho Mass Studies New Office Works Archie Pizzini Andrew Stiff Superimpose Taishin Shiozaki Shiozaki Lab WOHA
