Authenticity In Materials Development For Language Learning:

Authenticity in Materials Development for Language Learning Alan Maley, Brian Tomlinson, 2017-11-06 This volume makes a unique contribution to the literature on materials development for language learning. It focuses on issues related to authenticity in materials development and includes research-based position statements, applications of theory to practice, and developments of theory from observed practice. Each paper concentrates on a different aspect of authenticity, and many of them introduce the reader to previously unexplored facets of authenticity. The chapters are sequenced so that the book moves from general discussion about the value of authenticity to reports of evaluations of authenticity to reports of the exploitation of authenticity in specific learning contexts. Many questions are raised, much revealing data is reported and analysed, and many pedagogic suggestions are made. The contributions here have been written so that they are of potential value to teachers, materials developers, postgraduate students, and to researchers. They are written to be academically rigorous but at the same time to be accessible to newcomers to the field and to experienced experts alike.

Research for Materials Development in Language Learning Brian Tomlinson, Hitomi Masuhara, 2010-11-18 This title examines current research in materials development and discusses their implications for the learning and teaching of languages. Recently there has been a dramatic increase in the attention given to materials development as an academic discipline. More universities are including modules on materials development on their MA in applied linguistics courses, and more students are studying materials development in their PhD research. Yet to date there has been no publication focusing on reporting and discussing the results of research in materials development. This fills that gap, reporting on the results of recent research projects in materials development and discussing their implications for the learning and teaching of languages. The editors' introduction outlines the rationale, scope, and objectives of the book and reviews previously published reports of research in materials development. There are concluding chapters which point out implications for second language acquisition theory and research methodology. The book features suggested applications of the reported research for materials development and proposals for future action in research in materials development for language teaching.
