Critical Incident Stress Management in Aviation Jörg Leonhardt, Mr Joachim Vogt, 2012-10-01
Critical incident stress management CISM is now a well established method in crisis intervention and one that is clearly needed within aviation. However, there are many peculiarities in this branch of CISM which require thorough consideration. People working in high reliability environments need to be sensitive to others' reactions to critical stress. They are the normal reactions of normal people in abnormal situations. However, to ensure this, a proper programme must be put in place based on a scientific and standardized approach. This book describes the various methods and elements of the CISM model as well as their interventions. It also investigates the benefits of CISM on the individual level and on an organisational strategic level. It details CISM training and courses and features a case study based on the Berlingen accident of 2002. Critical Incident Stress Management in Aviation will be of direct relevance to human factors experts, safety managers, ATCOs and air navigation service providers, though there is also much that will be of interest to aviation physicians, psychologists and airport/airline managers.

Civilian Crisis Management: the EU Way Catriona Gourlay, 2022 European Approaches to Crisis Management Knud Erik Jørgensen, 1997
This book presents an up to date scholarly analysis of European crisis management during the 1990s and is one of the first books to summarize European experiences in the field of peacekeeping and crisis management. With the help of eight case studies, the authors explore how European governments have responded to international crises. The book also contains in depth studies on key concepts like humanitarian intervention, military doctrine and Petersberg tasks. The book describes Europe's increasing responsibility for the proper functioning of international society. It points to a pronounced move to collective action and highlights Europe's political and military adaptation to the post Cold War strategic environment. The authors detect an ever stronger belief in the use of military power and thereby the contours of an emerging common European identity within the field of crisis management. The book establishes an agenda for future research on European crisis management and out of area operations. It will be of prime interest to students of international relations, European studies, foreign policy analysis, international organization, crisis management and conflict resolution and will also be essential reading for all those who need a practical survey of the latest developments in the field of international crisis management.

Fundamentals of Aviation Crisis and Emergency Management Gail A. Rowntree, 2024
This book takes the topic of aviation crisis and emergency management and walks the reader through what aviation organisations must consider alongside legislation to fully respond to an incident. It offers both theory and practical tips and ideas along with templates and checklists to help build confidence in how to run an aviation emergency operation. This includes timelines for activation, setting up and managing humanitarian centres and how a full aviation crisis operation runs at the site of the incident. Fundamentals of Aviation Crisis and Emergency Management is the only textbook available to have all required elements laid out chronologically. This lays out an aviation incident from start to finish and leaves nothing to

chance The reader can plan for train for and exercise for a multitude of crisis examples building both confidence and competence in managing an incident Fundamentals of Aviation Crisis and Emergency Management includes a range of case studies and a variety of interviews with those people who have experienced an aviation crisis and deployed to it This allows the reader to fully immerse themselves in the topic and makes the book both a textbook of key knowledge but also a book that can be read for increasing understanding of the topic It will be essential for aviation students and professionals disaster response organisations and emergency planners *Flying Safely in Europe* European Commission. Directorate-General for Energy and Transport,2005 The safety and security of aircraft operations is of great importance to all European citizens Maintaining confidence in what is already one of the safest aviation regions in the world is critical to the continued development of the common EU aviation market and to the free movement of people within it as well as to the economic growth of the companies which depend on it This brochure outlines the measures taken by the European Union to develop common legally binding rules for aviation within this common market These concern both the safety of civil aviation concerning technical aspects of equipment and its operation and security responding to the increased threat of malicious attacks on aircraft and their passengers and crew **Risk and Crisis Communication in Europe** Audra
