Laetrile / Vitamin B17 Treatment For Cancer

by Mike Vrentas
Independent Cancer Research Foundation, Inc.

TREATMENT RATING: This cancer protocol is very effective at getting rid of cancer cells and to some degree also helps build the immune system. However, this protocol does not contain the super-nutrients which deal with reversing damage to the non-cancerous cells due to cancer (e.g. lactic acid), chemotherapy, radiation, etc.

Most cancer patients die as a result of the damage to their non-cancerous cells. This cancer protocol is not a complete protocol which deals with the most dangerous issues faced by advanced cancer patients.

Furthermore, this protocol does not have expert technical support which is the single most important factor in surviving advanced cancer.

However, in a clinic setting, especially in Mexico, high levels of laetrile are provided in a liquid I.V. In these clinics the doctors also deal with the issues of damage to non-cancerous cells and rebuilding the immune system.

In the United States, the totally corrupt Food and Drug Administration (FDA) has again started persecuting natural medicine clinics that use liquid laetrile (i.e. B17).

For home use, laetrile is part of the Collect-Budwig protocol and a person who wishes to use laetrile at home should use this protocol after reading the rest of this article:

[Collect-Budwig Protocol](#)

If the patient cannot afford the Collect-Budwig protocol (which costs several hundred dollars a month), they should combine laetrile with the Dirt Cheap Protocol:

[Dirt Cheap Protocol](#)

If using this protocol at home make sure you use both liquid laetrile or laetrile pills plus key supplements (discussed below) and apricot seeds!!
