How to Play Backgammon for Beginners George Federick, 2021-02-21. LEARN HOW TO PLAY BACKGAMMON LIKE A PRO. Backgammon is the most popular board game for 2 players, origins dating as far back as 3000 BC. It is a game of luck and strategy and popular around the world. Easy to learn and fun to play, it is no wonder why it has withstood the test of time and is played by so many people. The object of the game is to move all your checkers into your own home board and then bear them off. The first player to bear off all of their checkers wins the game. Backgammon is not being played properly unless it is being played for stakes. So the ultimate objective of a Backgammon match is to win more stakes than the opponent, which is the main aim of this guide. Backgammon for Complete Beginners Robert Ticker, 2021-01-11. Backgammon is a fun strategic game played by two players. Be the first player to remove all your checkers from the board to win this game. Backgammon is easy to learn but takes time to master. The object of Backgammon is to move your checkers around the board by rolling dice. The number rolled equals the number of points a checker can move. First move all your checkers to your home board. Second move all your checkers off the board. The game begins with each player rolling one die. The player with the higher number rolled gets to use both dice for the first move. Each die is moved separately and can be moved forward to any point that is not blocked. When your opponent has two or more checkers on a point, that point is blocked. If the point has your own checkers, no checkers, or only one opponent checker, the point is open. When both dice are rolled with the same number, the player will move double. For example, if double threes are rolled, the player will move three points four times. When a player moves a checker onto a point that only has one opponent checker, the opponent's checker is placed on the middle bar. Any checker on the middle bar has to be returned into play before making any other moves. A checker returns to the board on your farthest point, i.e., the 24th point.
