MOTORS,2013-12-19 This might be called a sketch book of engines Pictures have been substituted for words wherever
possible and the technical language has been held to a minimum Most people today have at least a nodding acquaintance
with the internal combustion engine To the great majority it is what makes an automobile go But to others it may be the
motive power for a tractor or truck a cruiser or a tug boat a fighter plane or a transport It may furnish power and light to an
isolated farm to a saw mill in the woods or to an entire city For today the internal combustion engine has invaded all fields
from the bottom of the ocean to the limits of the heavens We will demonstrate that they all are based on three things AIR
FUEL and IGNITION We need those three things to make any internal combustion engine run We have rather arbitrarily
classified them in three groups automobile aircraft and Diesel 1955 Public Relations Staff GENERAL MOTORS The Boys'

Ford and Mercury cars and trucks from the late 1950s to the mid 1970s For many of the later years FE engines were used
primarily in truck applications However the FE engine is experiencing a renaissance it is now popular in high performance
street strip muscle cars and even high performance trucks While high performance build up principles and techniques are
discussed for all engines author Barry Rabotnick focuses on the max performance build up for the most popular engines the
