Christianity and Social Change in Contemporary Africa: Volume One B. Nyamnjoh, A. Carpenter, 2020-05-25 This volume brings together seven empirically grounded contributions by African social scientists of different disciplinary backgrounds. The authors explore the social impact of religious innovation and competition in present day Africa. They represent a selection from an interdisciplinary initiative that made 23 research grants for theologians and social scientists to study Christianity and social change in contemporary Africa. These contributions focus on a variety of dynamics in contemporary African religion, mostly Christianity, including gender, health and healing, social media, entrepreneurship and inter religious borrowing and accommodation. The volume seeks to enhance understanding of religions' vital presence and power in contemporary Africa. It reveals problems as well as possibilities, notably some ethical concerns and psychological maladies that arise in some of these new movements, notably neo Pentecostal and militant fundamentalist groups. Yet the contributions do not fixate on African problems and victimization. Instead they explore sources of African creativity, resiliency and agency. The book calls on scholars of religion and religiosity in Africa to invest new conceptual and methodological energy in understanding what it means to be actively religious in Africa today.

The Hospital Autopsy Julian L. Burton, Guy Ratty, 2010-06-25 Now in full colour this new and revised edition of *The Hospital Autopsy* presents a clear and systematic approach to safe and effective modern autopsy practice for pathologists. It begins by discussing issues such as legislation governing autopsies, religious attitudes and ensuring safety before covering the procedures of external examination, evisceration, dissection of internal organs and report writing. Six new chapters have been added and contemporary specialist techniques such as near virtual autopsy are covered in depth with chapters devoted to complex issues including perinatal autopsies, maternal deaths and autopsies where the cause of death is unascertained. *The Hospital Autopsy* is an indispensable resource for pathologists in training as well as a concise reference for practicing pathologists and autopsy technicians.
