Innovations in Computing Sushil Kamboj, Pardeep Singh Tiwana, 2025-10-01 This book presents cutting edge research emerging trends and groundbreaking innovations in the field of computing It offers insights into real world applications that leverage computational methods and the ever evolving landscape of machine learning This title comprises a selection of papers that reflect a dynamic exchange of ideas in the field of Internet of things Cloud Computing Machine Learning Networks System Design and Methodologies Big Data Analytics and Applications ICT for Sustainable Environment and Artificial Intelligence With practical solutions illustrated through case studies and examples this book will be a useful technical guide for solving real world challenges This book serves as a gateway for researchers academicians undergraduate and post graduate students and professionals to explore the forefront of computational innovation and the dynamic advancements transforming computer science

Advances in Computing, Communication, Automation and Biomedical Technology M. G. Sumithra ,Arulmurugan Ramu ,Chow Chee Onn, 2020-12-30 Advances in Computing Communication Automation and Biomedical Technology aims to bring together leading academic scientists researchers industry representatives postdoctoral fellows and research scholars around the world to share their knowledge and research expertise to advances in the areas of Computing Communication Electrical Civil Mechanical and Biomedical Systems as well as to create a prospective collaboration and networking on various areas It also provides a premier interdisciplinary platform for researchers practitioners and educators to present and discuss the most recent innovations trends and concerns as well as practical challenges encountered and solutions adopted in the fields of innovation

Integrating Metaheuristics in Computer Vision for Real-World Optimization Problems Shubham Mahajan, Kapil Joshi, Amit Kant Pandit, Nitish Pathak, 2024-08-27 A comprehensive book providing high quality research addressing challenges in theoretical and application aspects of soft computing and machine learning in image processing and computer vision Researchers are working to create new algorithms that combine the methods provided by CI approaches to solve the problems of image processing and computer vision such as image size noise illumination and security The 19 chapters in this book examine computational intelligence CI approaches as alternative solutions for automatic computer vision and image processing systems in a wide range of applications using machine learning and soft computing Applications highlighted in the book include diagnostic and therapeutic techniques for ischemic stroke object detection tracking face detection and recognition computational based strategies for drug repositioning and improving performance with feature selection extraction and learning methods capable of retrieving photometric and geometric transformed images concepts of trading the cryptocurrency market based on smart price action strategies comparative evaluation and prediction of exoplanets using machine learning methods the risk of using failure rate with the help of MTTF and MTBF to calculate reliability a detailed description of various techniques using edge detection algorithms machine learning in smart houses the strengths and

limitations of swarm intelligence and computation how to use bidirectional LSTM for heart arrhythmia detection a comprehensive study of content based image retrieval techniques for feature extraction machine learning approaches to understanding angiogenesis handwritten image enhancement based on neutrosophic fuzzy Audience The book has been designed for researchers engineers graduate and post graduate students wanting to learn more about the theoretical and application aspects of soft computing and machine learning in image processing and computer vision Paper ,1984
