From Etymology To Pragmatics Metaphorical And Cultural Aspects Of Semantic Structure Cambridge Studies In Linguistics:

From Etymology to Pragmatics Eve Sweetser, 1990 This book offers a new approach to the analysis of the multiple meanings of English modals conjunctions conditionals and perception verbs Although such ambiguities cannot easily be accounted for by feature analyses of word meaning Eve Sweetser's argument shows that they can be analyzed both readily and systematically Meaning relationships in general cannot be understood independently of human cognitive structure including the metaphorical and cultural aspects of that structure Sweetser shows that both lexical polysemy and pragmatic ambiguity are shaped by our metaphorical folk understanding of epistemic processes and of speech interaction Similar regularities can be shown to structure the contrast among root epistemic and speech act uses of modal verbs multiple uses of conjunctions and conditionals and certain processes of historical change observed in Indo European languages Since polysemy is typically the intermediate step in semantic change the same regularities observable in polysemy can be extended to an analysis of semantic change

Reviewing Linguistic Thought Sophia Marmaridou, Kiki Nikiforidou, Eleni Antonopoulou, 2011-05-12 The volume focuses on the interaction of different levels of linguistic analysis syntax semantics pragmatics and the interfaces between them on the convergence of different theoretical models in explaining linguistic phenomena and on recent interdisciplinary approaches to linguistic analysis Its theoretical importance lies in bringing out and highlighting some of the common trends and directions found in recent theoretical frameworks which focus on themes traditionally downplayed by mainstream 20th century linguistics It further familiarizes the reader with the methodology used in such frameworks and shows how methodology developed in different theoretical perspectives can often converge in yielding similar results While representing different traditions all papers in this volume assume a necessity for the study of language to be paired with the study of cognition and for linguistics to develop more substantive links to other disciplines thereby creating converging trends into the new century The structure of this volume reflects this assumption along a cline of theoretical models and methodologies starting from those that view language as part of cognition and ending with those that consider the language faculty to be distinct from general cognition Thus the volume is divided into five parts I relaxing level boundaries II focusing on level interaction III drawing on different theories IV exploring field interaction and V interdisciplinary perspectives on modularity The volume is of particular relevance to scholars and students who are interested in an in depth overview of 20th century linguistics outside beyond the generative paradigm and in exploring the development of 20th century legacy into current work

Conceptual Blending in Early Christian Discourse Aleksander Gomola, 2018-03-19 Cognitive linguists and biblical and patristic scholars have recently

given more attention to the presence of conceptual blends in early Christian texts yet there has been so far no comprehensive study of the general role of conceptual blending as a generator of novel meanings in early Christianity as a religious system with its own identity This monograph points in that direction and is a cognitive linguistic exploration of pastoral metaphors in a wide range of patristic texts presenting them as variants of THE CHURCH IS A FLOCK network Such metaphors or blends rooted in the Bible were used by Patristic writers to conceptualize a great number of particular notions that were constitutive for the early church including the responsibilities of the clergy and the laity morality and penance church unity baptism and soteriology This study shows how these blends became indispensable building blocks of a new religious system and explains the role of conceptual blending in this process The book is addressed to biblical and patristic scholars interested in a new unifying perspective for various strands of early Christian thought and to cognitive linguists interested in the role of conceptual integration in religious language Produced with the support of the Faculty of Philology Jagiellonian University in Krak w Poland

Jesus and Gospel Traditions in Bilingual Context Sang-Il Lee, 2012-04-26 Most historical Jesus and Gospel scholars have supposed three hypotheses of unidirectionality geographically the more Judaeo Palestinian the earlier modally the more oral the earlier and linguistically the more Aramaized the earlier These are based on the chronological assumption of the earlier the more original These four long held hypotheses have been applied as authenticity criteria However this book proposes that linguistic milieus of 1st century Palestine and the Roman Near East were bilingual in Greek and vernacular languages and that the earliest church in Jerusalem was a bilingual Christian community The study of bilingualism blurs the

lines between each of the temporal dichotomies The bilingual approach undermines unidirectional assumptions prevalent among Gospels and Acts scholarship with regard to the major issues of source criticism textual criticism form criticism redaction criticism literary criticism the Synoptic Problem the Historical Jesus provenances of the Gospels and Acts the development of Christological titles and the development of early Christianity There is a need for New Testament studies to rethink the major issues from the perspective of the interdirectionality theory based on bilingualism
