Global Mergers and Acquisitions Abdol S. Soofi, Yuqin Zhang, 2018-03-19 This book primarily deals with corporate restructuring through mergers and acquisitions M A s It critically examines all functions that must be performed in completing an M A transaction Domestic and crossborder M A s are very similar in many respects even though differences between them also exist The book includes discussions of international finance and multinational financial management the topics that arise in cross border M A transactions Given the increasing importance of China as the second largest economy in the world and Chinese companies growing merger and acquisition M A activities globally we devote the last two chapters of the book to China s outward foreign direct investment and cross border M A activities Moreover the second volume includes the case studies regarding Chinese foreign direct investment both in Greenfield and acquisition forms give additional insights into challenging tasks of due diligence and post merger cultural integration that foreign investors face The M A literature is a fragmented field of inquiry This book brings together important practical insights from this vast literature in a short but cohesive form that has high managerial relevance

Analytical Theory of Democracy Andranik Tangian, 2020-03-30 This book operationalizes the idea of political representation which is fundamental to modern democracies Both individual representatives and representative bodies are evaluated using the indices of popularity the average percentage of the population whose opinion is represented on topical policy issues and universality the percentage of issues for which the prevailing public opinion is represented Viewed as objective functions these indices can aid in the search for optimal representatives and representative bodies By replacing the consistency analysis of the social choice axioms with the calculation of the best compromises the paradoxes of social choice such as those of Condorcet and Arrow can be overcome These indices also form the core of an alternative election method that is aimed at enhancing policy representation a recent concept of political representation which is not supported by the conventional voting systems shaped during the American and French Revolutions This method is tested in a series of election experiments that focus on implementation details In addition non societal applications such as MCDM finance or traffic control are considered where the objects that reflect the properties or behavior of other objects are regarded as their representatives Given its scope the book will appeal to political scientists economists and operations researchers as well as to politicians interested in improving democratic performance and electoral system design
