Marketing reversed prior business logic 50 years ago and said the customer is king and the companies began to recognize that
it was not just the product that was the most important aspect of their business Companies recognized that consumers had a
myriad of choices of product offerings and marketing was responsible to ensure that the company's products had the benefits
and attributes that customers wanted and were willing to pay for Today considering the technology development which
influences every function of the company the focus of the successful marketing oriented companies has changed from the
customer is king to the customer is a dictator However and despite the new trends in marketing like any social science
marketing has basic principles and these principles need to be considered when making any type of marketing decisions So
the major step of a student of marketing whether it is a young university student or an experienced business executive is to
understand the principles of marketing and reading the present book will be the first step in accomplishing this task This
book describes these basic principles of marketing and while the authors recognize that each decision may be slightly
different from any previous decision the rules or principles remain the same The present book presents these basic
marketing principles and tries to capture the essence of practical and modern marketing today Therefore the purpose of
Principles of Marketing is to introduce readers to the fascinating world of marketing today in an easy enjoyable and practical
way offering an attractive text from which to learn about and teach marketing **Fundamentals of Marketing** Tom
