Fundamentals Of Steam Turbine Systems:

Proceedings of the 8th International Conference on Foundations of Computer-Aided Process Design

,2014-07-14 This volume collects together the presentations at the Eighth International Conference on Foundations of Computer Aided Process Design FOCAPD 2014 an event that brings together researchers educators and practitioners to identify new challenges and opportunities for process and product design The chemical industry is currently entering a new phase of rapid evolution The availability of low cost feedstocks from natural gas is causing renewed investment in basic chemicals in the OECD while societal pressures for sustainability and energy security continue to be key drivers in technology development and product selection This dynamic environment creates opportunities to launch new products and processes and to demonstrate new methodologies for innovation synthesis and design FOCAPD 2014 fosters constructive interaction among thought leaders from academia industry and government and provides a showcase for the latest research in product and process design Focuses exclusively on the fundamentals and applications of computer aided design for the process industries Provides a fully archival and indexed record of the FOCAPD14 conference Aligns the FOCAPD series with the ESCAPE and PSE series **Energy Research Abstracts** ,1977 Semiannual with semiannual and annual indexes
