different subregion of the West evaluating the question of whether the fire regimes extant at the time of European contact were the product of natural factors or whether ignitions by Native Americans fundamentally changed those regimes An introductory essay offers context for the regional chapters and a concluding section compares results from the various regions and highlights patterns both common to the West as a whole and distinctive for various parts of the western states The final section also relates the findings to policy questions concerning the management of natural areas particularly on federal lands and of the naturalness of the pre European western landscape **General Technical Report RM. ,1996**

expected outrage and accusations of heresy but this letter was different it accused him of taking credit for a theory that wasn't his Yet when he tried to trace his intellectual forebears he found that history had already forgotten them Rediscovering Aristotle on the shores of Lesbos and Leonardo da Vinci fossil hunting in the Tuscan hills this is a masterful retelling of the collective daring of a few like minded men whose early theories flew in the face of prevailing political and religious orthodoxies and laid the foundations for Darwin's revolutionary idea *Living Archaeology* Richard A.
