The Architecture of Phantasmagoria Libero Andreotti, Nadir Lahiji, 2016-11-10 In a time of mass mediated modernity the city becomes almost by definition a constitutively mediated city Today more than ever before the omnipresence of media in every sphere of culture is creating a new urban ontology saturating fracturing and exacerbating the manifold experience of city life The authors describe this condition as one of hyper mediation a qualitatively new phase in the city's historical evolution The concept of phantasmagoria has pride of place in their study using it as an all embracing explanatory framework they explore its meanings as a critical category to understand the culture and the architecture of the contemporary city Andreotti and Lahiji argue that any account of architecture that does not include understanding the role and function of media and its impact on the city in the present tele technological capitalist society is fundamentally flawed and incomplete Their approach moves from Walter Benjamin through the concepts of phantasmagoria and of media as theorized also by Theodor Adorno Siegfried Kracauer and a new generation of contemporary critics towards a new socio critical and aesthetic analysis of the mediated space of the contemporary city

Art in Consumer Culture Grace McQuilten, 2017-07-05 Written with beautiful clarity Art in Consumer Culture Mis Design asks the contemporary art world to be honest about the pervasive effects of commodification and the difficulty of staging critique The book examines the

collusion of art and design in contemporary artistic practices in order to find avenues of critique in a commercially driven cultural landscape Grace McQuilten focuses on the work of Takashi Murakami Andrea Zittel Adam Kalkin and Vito Acconci four contemporary artists who claim to be working in the field of design rather than the traditional art world McQuilten argues that Zittel Acconci and Kalkin engage with design only to reactivate the critical practice of art in a more direct engagement with capital and conceives of and affirms a future for art outside of the art world as a parasite in the complex beast of late capitalism This book is an important and timely provocation to a cynical and apathetic consumer culture and a call to arms for creative freedom and critical thought

Video Theories Dieter Daniels, Jan Thoben, 2022-01-29 Breaking new ground as the first transdisciplinary reader in this field Video Theories is a resource that will form the basis for further research and teaching While theories of video have not yet formed an academic discipline comparable to the more canonized theories of photography film and television the reader offers a major step toward bridging this video gap in media theory which is remarkable considering today's omnipresence of the medium through online video portals and social media Consisting of a selection of eighty three annotated source texts and twelve chapter introductions written by the editors this book considers fifty years of scholarly and artistic reflections on the topic representing an intergenerational and international set of voices This transdisciplinary reader offers a conceptual framework for diverging and contradictory viewpoints following the continuous transformations of what video was is and will be

Hijacking Sustainability Adrian Parr, 2012-02-10 How the sustainability movement has been co-opted from ecobranding by Wal Mart to the greening of the American military The idea of sustainability has gone mainstream Thanks to Prius driving movie stars it's even hip What began as a grassroots movement to promote responsible development has become a bullet point in corporate ecobranding strategies In Hijacking Sustainability Adrian Parr describes how this has happened how the goals of an environmental movement came to be mediated by corporate interests government and the military Parr argues that the more popular sustainable development becomes the more commodified it becomes the more mainstream culture embraces the sustainability movement's concern over global warming and poverty the more sustainability culture advances the profit maximizing values of corporate capitalism And the more issues of sustainability are aligned with those of national security the more military values are conflated with the goals of sustainable development Parr looks closely at five examples of the hijacking of sustainability corporate image greening Hollywood activism gated communities the greening of the White House and the incongruous efforts to achieve a sustainable army Parr then examines key challenges to sustainability waste disposal disaster relief and environmental refugees slum development and poverty Sustainability Parr says offers an alternative narrative of the collective good an idea now compromised and endangered by corporate military and government interests

Riding with Death Jana Evans Braziel, 2017-06-22 On the southern end of the Grand Rue a major thoroughfare that runs through the center of Port au Prince waits the Haitian capital's automobile repair district This veritable junkyard of steel and

rubber recycled parts old tires and scrap metal might seem an unlikely foundry for art Yet on the street s opposite end thrives the Grand Rue Galerie a working studio of assembled art and sculptures wrought from the refuse Established by artists Andr Eug ne and Jean H rard Celeur in the late 1990s the Grand Rue s urban environmental aesthetics defined by motifs of machinic urbanism Vodou bricolage the postprimitivist altermodern and performative politics radically challenge ideas about consumption waste and environmental hazards as well as consider innovative solutions to these problems in the midst of poverty insufficient social welfare lack of access to arts education and basic needs In *Riding with Death* Jana Evans Braziel explores the urban environmental aesthetics of the Grand Rue sculptors and the beautifully constructed sculptures they have designed from salvaged automobile parts rubber tires carved wood and other recycled materials Through first person accounts and fieldwork Braziel constructs an urban ecological framework for understanding these sculptures amid environmental degradation and grinding poverty Above all Braziel presents Haitian artists who live on the most challenged Caribbean island yet who thrive as creators reinventing refuse as art and resisting the abjection of their circumstances

The Age of Spectacle Tom Dyckhoff,2017-04-20 A great storyteller you would be hard pushed to find a more knowledgeable or entertaining guide Icon Such an interesting book I cannot recommend it enough Lauren Laverne In Dubai a luxury apartment block is built in the shape of a giant iPod In China President Xi Jinping denounces the trend of constructing bizarre new buildings in wacky shapes and colours In Cincinnati celebrity architect Zaha Hadid is paid millions to design a single iconic structure with the hope of single handedly transforming the region s ailing fortunes These incidents are all part of the same story the rise of the age of spectacle Over the last fifty years there has been a revolution in how our cities operate In *The Age of Spectacle* Tom Dyckhoff tells the story of how architecture became obsessed with the flashy the monumental and the ostentatious and how we all have to live with the consequences Exploring cityscapes from New York to Beijing and from Bilbao to Portsmouth Dyckhoff shows that we are not just witnessing a new kind of building we are living through a fundamental transformation in how our urban spaces work The corporate explosion of the last few decades has fundamentally shifted the relationship between architects politicians and cities inhabitants fostering innovative new kinds of engineering and design but also facilitating ill conceived vanity projects and commercial power grabs Timely passionate and bursting with new ideas *The Age of Spectacle* is both an examination of how twenty first century cities work and a manifesto for a radically new kind of

urbanism Our cities Dyckhoff shows can thrive in the age of spectacle but only if they engage us not just with dazzling structures but by responding to the needs of the people who inhabit them Engaging The iconic building is the most obvious architectural phenomenon of our age yet somehow no one has quite done what Tom Dyckhoff does with The Age of Spectacle which is to tell its story clearly and plainly Rowan Moore Observer First class Finally a book that nails the iconic movement Tom Dyckhoff s The Age of Spectacle is the book that I wish I had written Simon Jenkins Unusually accessible and well argued Evening Standard

Architecture and the Image at the Turn of the 21st Century Sanja Rodeš,2024-06-28 This book examines architecture image and media relationships as productive for architecture and architectural discourses By arguing that the relationships between architecture and media cannot be dismissed via linear criticism of architecture and media or image these relations are instead seen as a part of a sphere a mediasphere of complex relationships In lieu of anything like a consensus on the contemporary condition of architecture referring to the late twentieth and the twenty first centuries the starting point of this book is that the relationships between architecture media and images continue to multiply owing to continuous technological advancements Contemporary architecture considered in this book is related to the selected circumstances of high visibility where architectural images are propelled into visibility and conflated with non architectural images This takes architecture outside of architectural only discourse and into the public realm By granting higher visibility to both the architectural images and architecture in the public realm architecture can also be influenced by the various perceptions of the general public and can enter public consciousness via non architectural media With increased visibility architecture s far reaching presence calls for more structured analysis of its nature and potential As the analysed architecture in this book is associated with the discourses outside of architecture some of which relate to terrorism natural disaster and branding and consumption the limits of contemporary architectural discipline are questioned and extended This book is written for academics and students in architectural history theory and criticism particularly those interested in visual and media studies

Art and Archive. Genealogy and Contemporaneity (1920-2010) Anna Maria Guasch, 2024-12-31 This book provides a comprehensive exploration of the relationship between art and the archive The author examines how artists have engaged with archival materials practices and methodologies throughout history from the avant garde movements of the early 20th century to contemporary artistic practices She explores the ways in which artists have appropriated transformed and recontextualized archival documents and narratives to create new meanings and perspectives on history memory and identity Guasch also discusses the role of the archive in shaping artistic production reception and historiography highlighting its significance as a site of cultural memory and knowledge production Through a series of case studies and theoretical reflections the book offers insights into the diverse ways in which artists have navigated the archive as a source of inspiration critique and intervention in the artistic process Art and Archive represents an archaeological and genealogical history of the relationships sometimes linear sometimes discontinuous between art and the archive The archive ceases to be a dusty space or a repository of historical artifacts to become an active discursive and relational system that establishes aesthetically socially and politically new relationships of temporality between past present and future in what is understood as the time of the future perfect

Moving Objects Damon Taylor, 2020-09-17 Moving Objects deals with emotive design designed objects that demand to be engaged with rather than simply used If postmodernism depended upon ironic distance and Critical Design is all about questions then emotive design runs hotter than this confronting how designers are using feelings in what they make Damon Taylor s original study considers these emotionally laden highly authored works often produced in limited editions and sold like art objects such as a chair made from cuddly toys a leather sofa that resembles a cow and a jewellery box fashioned from human hair Tracing the phenomenon back to the Dutch inflection that began with Droog designers like Jurgen Bey and Hella Jongerius Taylor conducts an analysis of the development of Design Art and looks for its origins in the uncanny explorations of surrealism Offering a critique of Speculative Design and an examination of the work of designers such as Mathias Bengtsson whose work involves growing furniture inside computers Taylor asks what happens when the tangible melts into the datascape and design becomes a question of mobilities In this way Moving Objects examines contemporary issues of how we live with artefacts and what design can do
