Jacko,2011-06-24 This four volume set LNCS 6761 6764 constitutes the refereed proceedings of the 14th International Conference on Human Computer Interaction HCII 2011 held in Orlando FL USA in July 2011 jointly with 8 other thematically similar conferences The revised papers presented were carefully reviewed and selected from numerous submissions The papers accepted for presentation thoroughly cover the entire field of Human Computer Interaction addressing major advances in knowledge and effective use of computers in a variety of application areas The papers of this first volume are organized in topical sections on HCI design model based and patterns based design and development cognitive psychological and behavioural issues in HCI development methods algorithms tools and environments and image processing and retrieval in HCI **Ethics in Design and Communication** Laura Scherling,Andrew DeRosa,2020-02-20 This timely collection brings together critical analytic historical and practical studies to address what ethics means in the practice of design Designers face the same challenges as everyone else in the complex conditions of contemporary cultural life choices about consumption waste exploitation ecological damage and political problems built into the supply chains on which the global systems of inequity currently balance precariously But designers face the additional

dilemma that their paid work is often entangled with promoting the same systems such critical approaches seek to redress how to reconcile this contradiction among others in seeking to chart an ethical course of action while still functioning effectively in the world Ethics in Design and Communication acknowledges the complexity of this subject matter while also demonstrating that in the ongoing struggle towards an equitable and sustainable world the talents of design and critical thought are essential Featured case studies include graphic design internships today the dark web and media coverage of the 2016 US presidential election The fact that within this book such a wide array of practitioners scholars critics and professionals commit to addressing current injustices is already a positive sign Nonetheless it is essential that we guard against confusing the coercive force of moral imperatives with ethical deliberation when conceiving a foundation for action

In through the Side Door Erin Malone, 2024-10-15 The vital story of how women designers and researchers pioneered the field of interaction and user experience design for software and digital interfaces. Framed against the backdrop of contemporary waves of feminism and the history of computing design, *In through the Side Door* foregrounds the stories of the women working in the field of computing and the emergent discipline of interaction design as the graphical user interface was developed. Erin Malone begins with a handful of pioneers who brought to the field various methods from a variety of backgrounds including design, technical communication, social psychology, ethnography, information science, and mechanical engineering. Moving into the early days of desktop computing, the book highlights the women on the teams inventing contemporary desktop computer interfaces and related tools, including those at Xerox PARC, Apple's Human Interface Group, and Microsoft. Malone takes the reader through the invention of the World Wide Web, the third wave of feminism, and the dot-com boom and bust. Coming up to contemporary times, the book features women working on the web, designing equipment interfaces, and working in voice UX, mobile design, and civic design, and continues with the up-and-coming leaders driving social impact, changing human-centered design and research, and working to be accountable for the harms of contemporary software products. Along the way, the author also touches on the challenges and biases women have faced in the workplace and continue to encounter despite cultural and sociological advancements.

Communicating Mobility and Technology

Ehren Helmut Pflugfelder,2016-07-07 Winner of the 2018 CCCC Technical and Scientific Communication Award in the category of Best Book in Technical or Scientific Communication Responding to the effects of human mobility and crises such as depleting oil supplies Ehren Helmut Pflugfelder turns specifically to automobility a term used to describe the kinds of mobility afforded by autonomous automobile based movement technologies and their ramifications Thus far few studies in technical communication have explored the development of mobility technologies the immense power that highly structured environmentally significant systems have in the world or the human machine interactions that take place in such activities Applying kinaesthetic rhetoric a rhetoric that is sensitive to and developed from the mobile material context of these technologies Pflugfelder looks at transportation projects such as electric taxi cabs from the turn of the century to modern day open source vehicle projects and a large case study of an autonomous electric pod car network that ultimately failed Kinaesthetic rhetoric illuminates how mobility technologies have always been persuasive wherever and whenever linguistic symbol systems and material interactions enroll us often unconsciously into regimes of movement and ways of experiencing the world As Pflugfelder shows mobility technologies involve networks of sustained arguments that are as durable as the bonds between the actors in their networks
