Le Cosmos et le Lotus Xuan Thuan Trinh, 2011-09-01. Que nous dit vraiment la science sur la nature de l'univers, sur son origine et son avenir ? Par quel mystère le langage mathématique, pure création de l'esprit humain, se révèle-t-il aussi performant pour nous décrire les phénomènes physiques de l'infiniment petit à l'infiniment grand ? S'il existe un ordre du monde, ce que nous en disent la physique quantique et la théorie de la relativité, est-il compatible avec ce qu'enseigne le bouddhisme ? Et que peut-on en conclure concernant notre propre vie ? A ces questions passionnantes et beaucoup d'autres, le célèbre astrophysicien Trinh Xuan Thuan répond ici d'une façon personnelle en s'appuyant sur son expérience. Son itinéraire à la place d'embellie la confluence de trois cultures : issu d'une famille de lettrés vietnamiens imprégné de traditions bouddhistes et confucéennes, il a reçu une éducation française puis une formation scientifique américaine. Une telle richesse de points de vue lui permet d'apporter non pas des réponses toutes faites du haut de son savoir, mais des éléments de réflexion accessibles tous qui nous font participer à la grande aventure de l'astrophysique depuis un siècle. Entre le Cosmos que nous dévoile chaque jour la science et le Lotus de la sagesse orientale, Trinh Xuan Thuan nous invite à emprunter une voie d'intelligence ouverte.

Le béret d'Einstein Frédéric LEQUEVRE, 2015-11-01. Le béret d'Einstein, c'est le chapeau que beaucoup tentent de faire porter au physicien en suggérant que les théories qu'il a développées soutiendraient leurs idéologies. C'est par extension le symbole de toutes les récupérations effectuées au nom de la science. Certains prosélytes se passent en effet difficilement de récupérer les théories et les personnages scientifiques. La cosmologie moderne est largement sollicitée
