

A detailed photograph of a complex wooden truss system, likely from a bridge or a large building. The image shows numerous wooden beams of varying sizes, some horizontal and some diagonal, connected by metal gusset plates and bolts. The wood has a warm, natural tone. The perspective is from below, looking up at the structure.

Nielson, Jack C. McCormac, 2017-02-28 When teaching structural analysis some contend that students need broad exposure to many of the classical techniques of analysis while others argue that learners benefit more from the computer based analysis experiences that involve parametric studies Structural Analysis Understanding Behavior strikes a balance between these viewpoints Students may no longer need to know every classical technique but they still need a fundamental knowledge of the concepts which come from studying a subset of classical techniques This foundation is then

strengthened by the use of structural analysis software in activities designed to promote self discovery of structural concepts and behaviors This text was developed with this goal in mind
