

Designing and Conducting Semi-Structured Interviews for Research

Prepared by Ted Zorn

Waikato Management School

The most useful interview format for conducting qualitative research is often "semi-structured" (sometimes called "moderately scheduled"). This means the interview is not highly structured, as is the case of an interview that consists of all closed-ended questions, nor is it unstructured, such that the interviewee is simply given a license to talk freely about whatever comes up. Semi-structured interviews offer topics and questions to the interviewee, but are carefully designed to elicit the interviewee's ideas and opinions on the topic of interest, as opposed to leading the interviewee toward preconceived choices. They rely on the interviewer following up with probes to get in-depth information on topics off interest. Two underlying principles of the following suggestions are (1) strive to avoid leading the interview or imposing meanings, and (2) strive to create relaxed, comfortable conversation.

Following are some suggestions for designing such interviews:

1. Carefully plan the interview, even though it is to be only semi-structured. Write down the topics and questions you might conceivably want to ask and consider various ways of arranging them
