Classifications O10 O12 B41 D50 P48 **Epistemics of Development Economics** Kofi Kissi Dompere, Manzur Ejaz, 1995-08-22 The effective use of development economic theories in practice is limited the authors contend by the lack of explicit criterion for judging their scientific content The directional progress of critical research and teaching is also constrained by this deficiency This study advances a meta theory designed to assist in evaluating the scientific validity of theories in economic development and how these theories can be improved to assist social practice Using this model the study then examines existing theories dividing them into explanatory and prescriptive theories The explanatory theories include the stage based theories of Marx Schumpeter and Rostow and factor based theories including capital based human capital based and technology based theories The prescriptive theories include explanatory theory based prescriptions interventionist prescriptive theories and theories of economic planning In conclusion the authors contend that modern analysis of development economics is plagued with logical ills misleading notions and a weak theoretical structure that lacks scientific appeal Most of the theories except for those of Marx and Schumpeter neglect an analysis of the mechanism of change

Handbook of Development Economics Dani Rodrick, M.R. Rosenzweig, 2009-11-09 What guidance does academic research really provide to economic policy development The critical and analytical surveys in this volume investigate links between policies and outcomes by surveying work from broad macroeconomic policies to interventions in microfinance Asserting that there are no universal correspondences between policies and outcomes contributors demonstrate instead that only an intense familiarity with the development context and the universe of applicable economic models can generate successful policies Getting cause and effect right is essential for policy design and implementation With the goal of drawing researchers and policy makers closer this volume highlights our increasing understanding of ways to

combine economic theorizing with careful thoughtful empirical work Presents an accurate self contained survey of the current state of the field Summarizes the most recent discussions and elucidates new developments Although original material is also included the main aim is the provision of comprehensive and accessible surveys Development Economics ,19?? **Development Economics in the Twenty-First Century** Claudia Sunna,Davide Gualerzi,2015-12-14 Development Economics has been identified as a homogeneous body of theory since the 1950s concerned both with the study of development issues and with the shaping of more effective policies for less advanced economies Development Economics in the Twenty First Century brings together an international contributor team in order to explore the origins and evolution of development economics This book highlights the different elements of high development theory through a precise reconstruction of the different theoretical approaches that developed between the 1950s and the 1970s These include the theory of balanced and unbalanced growth theory the debate on international trade the concept of dualism dependency theory structuralism and the analysis of poverty and institutions The chapters highlight the relevance and usefulness of these analyses for the contemporary theoretical debate on development issues Comparative perspectives are explored and analysed including those of Keynes Hirschman Krugman and Stiglitz The chapters situate development economics within current debates among economists and historians of economic thought providing a platform for future research This book is suitable for researchers and students with an interest in Development Economics the History of Economic development and the Economics of Developing Countries **WIDER** United Nations University World Institute for Development Economics Research,1990 Development Economics Debraj Ray,1998-01-12 A landmark textbook on development economics The study of development in low income countries is attracting more attention around the world than ever before Yet until now there has been no comprehensive text that incorporates the recent huge strides made in the subject Development Economics does precisely that in a clear rigorous and elegant fashion Debraj Ray one of the most accomplished theorists in development economics today presents in this book a synthesis of recent and older literature in the field and raises important questions that will help to set the agenda for future research He covers such vital subjects as theories of economic growth economic inequality poverty and undernutrition population growth trade policy and the markets for land labor and credit A common point of view underlies the treatment of these subjects that much of the development process can be understood by studying factors that impede the efficient and equitable functioning of markets Diverse topics such as the new growth theory moral hazard in land contracts information based theories of credit markets and the macroeconomic implications of economic inequality come under this common methodological umbrella The book takes the position that there is no single cause for economic progress but that a combination of factors among them the improvement of physical and human capital the reduction of inequality and institutions that enable the background flow of information essential to market performance consistently favor development Ray supports his arguments throughout with examples from around the world The book

assumes a knowledge of only introductory economics and explains sophisticated concepts in simple direct language keeping the use of mathematics to a minimum Development Economics will be the definitive textbook in this subject for years to come It will prove useful to researchers by showing intriguing connections among a wide variety of subjects that are rarely discussed together in the same book And it will be an important resource for policy makers who increasingly find themselves dealing with complex issues of growth inequality poverty and social welfare *Development Economics and Policy Readings*

Ian Livingstone,1981-03-01 *The New Development Economics: After the Washington Consensus* , **Development Economics and Policy** ,1981 Empirical Development Economics Måns Söderbom,Francis Teal,Markus Eberhardt,Simon Quinn,Andrew Zeitlin,2014 Understanding why so many people across the world are so poor is one of the central intellectual challenges of our time What explains a pattern of extreme destitution for billions combined with plutocratic levels of income for a tiny minority This book offers a novel approach to addressing those issues not by providing answers but seeking to provide the tools and data that will enable the student the researcher and the professional working in this area to investigate the questions for themselves Empirical Development Economics has been designed as a hands on teaching tool to investigate the causes of poverty The book begins by introducing the basics of the quantitative approach to development economics All the topics are presented through data that addresses some important policy issue In Part 1 the focus is on the basics of understanding why incomes differ so much What is the role of education technology and institutions in ensuring that where you are born is so important in determining whether you are poor In Part 2 the focus is on techniques that allow us to address questions which include how firms invest how households decide how much to spend on education of their children whether microfinance does help the poor whether food aid works who gets private schooling and whether property rights enhance investment A distinctive feature of the book is its presentation of a range of approaches to studying development questions Development economics has undergone a major change in focus over the last decade with the rise of experimental methods to address development issues One of our objectives has been to show how such methods relate to more traditional ones Handbook of Development Economics Jere Behrman,T. N. Srinivasan,1995 Data and econometric tools for development analysis Angus Deaton Human Resources Empirical modeling of household and family decisions John Strauss Applied general equilibrium models for policy analysis Jan Willem Gunning Savings credit and insurance Timothy Besley Technological change and technology strategy Robert E Evenson Institutions and economic development Justin Yifu Lin Poverty institutions and the environmental resource base Partha Dasgupta *Frontiers of Development Economics* Gerald M. Meier,Joseph E. Stiglitz,2001 With contributions from 35 leading economists this forward looking book explores the future of development economics against the background of the past half century of development thought and practice Outstanding representatives of the past two generations of development economists assess development thinking at the turn of the century and look to the unsettled questions confronting the next generation The volume offers a thorough analysis of the

broad range of issues involved in development economics and it is especially timely in its critique of what is needed in development theory and policy to reduce poverty An overriding issue is whether in the future development economics is to be regarded simply as applied economics or whether the nature and scope of development economics will constitute a need for a special development theory to supplement general economic theory Frontiers of Development Economics is an ideal reference for all those working in the international development community *World Development Studies* United Nations University World Institute for Development Economics Research,1995 **Understanding Development Economics** Adam Fforde,
