Libraries Without Walls 6 Peter Brophy, Jenny Craven, Margaret Markland, Manchester Metropolitan University. Centre for Research in Library and Information Management, 2006 This edited collection is drawn from the sixth Libraries Without Walls Conference held in 2005. From their beginnings in 1995 the Libraries Without Walls conferences have mapped a major change in the practice of librarianship. While library services are still concerned to provide users with physical access to their buildings electronic access often from remote locations is becoming ever more dominant. Papers presented at previous LWW conferences have provided examples of how libraries are pushing out the frontiers of their services. In 2005 a different approach was taken. The question was asked: How do we know whether these new services are having a positive impact on our users? In response papers written by leading professionals worldwide followed these broad themes: theoretical approaches to the evaluation of the new services with an emphasis on qualitative methods; the user experience; what do we know about the users of these

services assessment of the usability including the accessibility of the services measuring the outcomes and impact Readership These state of the art papers will enable library managers and information professionals in all sectors to keep abreast of the latest developments in this vital area The book will also assist educational specialists and course developers in increasing their understanding of the role and importance of information in the learning process **Scholarly Digital Editions as Interfaces** Roman Bleier,Martina Bürgermeister,Helmut W. Klug,Frederike Neuber,Gerlinde Schneider,2018-11-15 Interfaces are important elements of digital scholarly editions as they allow and direct the interaction of users with the online content and they facilitate the access to and exchange of data and information Some interfaces are created for the human user GUI others for machine interaction and data exchange API Both aspects of interfaces and their roles in digital scholarly editing were discussed at a conference in 2016 organised by the Centre for Information Modelling at the University of Graz and the Digital Scholarly Editions Initial Training Network DiXiT This volume includes a range of papers presented at the conference that highlight the diverse views and approaches towards interfaces in the digital scholarly editing community **A Dictionary of Computing** Oxford University Press,2004 Searchable dictionary database of computer terminology covering computer applications in industry the office science education and the home the hardware software and telecommunications behind these applications *Libraries, Globalisation and Cooperation* Herbert K. Achleitner,Alexander Georgiev Dimchev,2005 *Artificial Unintelligence* Meredith Broussard,2019-01-29 A software developer s misadventures in computer programming machine learning and artificial intelligence reveal why we should never assume technology always get it right In *Artificial Unintelligence* Meredith Broussard argues that our collective enthusiasm for applying computer technology to every aspect of life has resulted in a tremendous amount of poorly designed systems We are so eager to do everything digitally hiring driving paying bills even choosing romantic partners that we have stopped demanding that our technology actually work Broussard a software developer and journalist reminds us that there are fundamental limits to what we can and should do with technology With this book she offers a guide to understanding the inner workings and outer limits of technology and issues a warning that we should never assume that computers always get things right Making a case against technochauvinism the belief that technology is always the solution Broussard argues that it s just not true that social problems would inevitably retreat before a digitally enabled Utopia To prove her point she undertakes a series of adventures in computer programming She goes for an alarming ride in a driverless car concluding the cyborg future is not coming any time soon uses artificial intelligence to investigate why students can t pass standardized tests deploys machine learning to predict which passengers survived the Titanic disaster and attempts to repair the U S campaign finance system by building AI software If we understand the limits of what we can do with technology Broussard tells us we can make better choices about what we should do with it to make the world better for everyone [A Dictionary of Computer Science](#) Andrew Butterfield,Gerard Ekembe Ngondi,2016 This bestselling dictionary has been fully revised
