Dictionary English To Persian For Mechanical Engineering:

Vocabulary of Mechanical Engineering Kazem Abhari, 2005 **Universal Dictionary of the English Language: Rhe-Z** Robert Hunter, 1897 **A Biographical Dictionary of People in Engineering** Carl W. Hall, 2008

Advancements in the field of engineering that have led to major inventions and discoveries are built on the foundations of predecessors and their work. In many cases, small steps are taken by a variety of researchers leading ultimately to a very momentous discovery. A Biographical Dictionary of People in Engineering Literature lists the work and contributions of thousands of people from many countries representing numerous fields of endeavor over many centuries. The ancient cultures of people in China, Arabia, India, and Japan; the renaissance culture of the Greeks, Egyptians, Romans; and in addition, the European cultures of the Russians, Germans, French, and others all have contributed to what is now called engineering. The terms engineer and engineering are rather recent, but former builders, architects, instrument makers, inventors, discoverers, and shop workers were part of the process. This work contains the necrologies, names, dates, and a brief biography up to the year 2000 of people who are found in engineering and invention literature. The names were culled from histories, biographies, literature, and handbooks, particularly from those reference titles including words such as distinguished, honored, leaders, outstanding, pioneers, prominent, recognized, renowned, and respected. The necrologies are necessarily abbreviated with the major employers and dates of employment and specialties listed, and references to the sources of information. This book is a must for reference collections and those in the media who cover the field of engineering advancement.

Stahl, Karen Landen, 2018-10-08

Published in 2001. Abbreviations, nicknames, jargon, and other short forms save time, space, and effort provided they are understood. Thousands of new and potentially confusing terms become part of the international vocabulary each year while our communications are relayed to one another with increasing speed. PDAs link to PCs. The Net has grown into a data central shopping mall and grocery store all rolled into one. E-mail is faster than snail mail; cell phones are faster yet, and it is all done 24/7. Longtime and widespread use of certain abbreviations such as R S V P has made them better understood standing alone than spelled out. Certainly we are more comfortable saying DNA than deoxyribonucleic acid, but how many people today really remember what the initials stand for? The Abbreviations Dictionary Tenth Edition gives you this and other information from Airlines of the World to the Zodiacal Signs.
