Web Gis Principles And Applications Book:

Web GIS Pinde Fu, Jiulin Sun, 2011 This book offers a balance of principles concepts and techniques to guide readers toward an understanding of how the World Wide Web can expand and modernize the way you use GIS technology book cover

Getting to Know Web GIS Pinde Fu, 2015-03-16 Getting to Know Web GIS a workbook with detailed step by step exercises teaches readers how to share resources online and build web GIS applications easily and quickly It covers Esri's suite of web GIS technologies including ArcGIS Online ArcGIS for Server web app templates WebApp Builder API for JavaScript mobile GIS apps mobile SDKs CityEngine and 3D web maps

High Performance Computing for Geospatial Applications Wenwu Tang, Shaowen Wang, 2020-07-20 This volume fills a research gap between the rapid development of High Performance Computing HPC approaches and their geospatial applications With a focus on geospatial applications the book discusses in detail how researchers apply HPC to tackle their geospatial problems Based on this focus the book identifies the opportunities and challenges revolving around geospatial applications of HPC Readers are introduced to the fundamentals of HPC and will learn how HPC methods are applied in various specific areas of geospatial study The book begins by discussing theoretical aspects and methodological uses of HPC within a geospatial context including parallel algorithms geospatial data handling spatial analysis and modeling and cartography and geovisualization Then specific domain applications of HPC are addressed in the contexts of earth science land use and land cover change urban studies transportation studies and social science The book will be of interest to scientists and engineers who are interested in applying cutting edge HPC technologies in their respective fields as well as students and faculty engaged in geography environmental science social science and computer science

GIScience Teaching and Learning Perspectives Shivanand Balram, James Boxall, 2019-01-31 This volume uniquely links educational theories and the practice of GIScience in higher education contexts to guide classroom practice present effective practical implementations from peers and provide resources and strategies for effective teaching methods The book offers a comprehensive exploration of GIScience education including current trends and future educational needs in GIScience and will act as a resource to prepare learners for a world that demands more intensive investment in present day education and technological literacy Additionally the indirect benefit of merging the fragmented literature on GIScience literacy will provide a basis to examine common techniques and enable a new wave of research more rooted in learning theories In ten chapters the book is designed to attract an audience from geographic information systems science geomatics spatial information science cartography information technology and educational technology as focus disciplines

GIS and Environmental Monitoring Stavros Kolios, Andrei V. Vorobev, Gulnara R. Vorobeva, Chrysostomos Stylios, 2017-06-07 This book constitutes a notable contribution to investigate and present the capabilities of Geographic Information Systems GIS and their applicability and usefulness in environmental related applications and sciences The focus is on the design creation development and operation of integrated Web based GIS

applications for weather marine and atmospheric environments and the Earth's magnetic field. More specifically the aim of this book is to present characteristic applications of GIS to environmental monitoring including GIS solutions for eco mapping sea and port related parameters climate changes and geomagnetic field. In the first part of the book the description of every application includes the user requirements the design and development stages performed and the presentation of the final outcome its capabilities and services. The Web based applications are developed through different innovative approaches such as cloud GIS and Google Apps for GIS justifying the merit of WebGIS in the world of the environmental applications. The second part of the book provides an overview of geomagnetic field parameters and reveals the potential of using GIS for modeling and analyzing of the Earth's magnetic geomagnetic field and its parameters. Here the authors present the recently introduced phenomenon called geomagnetic pseudostorm which is modeled and further analyzed here with GIS technology and tools. This book appeals to those interested in various areas where spatial information becomes of paramount relevance e.g. social and economic research and mapping environmental and climate research decision support systems public services and especially for geomagnetic field variations and for the design of warning systems for natural disasters. It presents modern methods and approaches to visualize and analyze spatial information using innovative techniques procedures and tools of WebGIS technology. In this book the readers find a valuable companion in their efforts to design and develop their own WebGIS applications as it includes useful examples of developing Web GIS applications regarding the monitoring of marine and atmospheric environments as well as applications that deal with meteorological issues and the Earth's magnetic field along with solar activity space weather information. This book can also serve as a useful reference source for graduates researchers and professionals related to the areas indicated above.

Advances in Cartography and Geographic Information Engineering Jiayao Wang, Fang Wu, 2021-07-30. This book reviews and summarizes the development and achievement in cartography and geographic information engineering in China over the past 60 years after the founding of the People's Republic of China. It comprehensively reflects cartography as a traditional discipline has almost the same long history with the world's first culture and has experienced extraordinary and great changes. The book consists of nineteen thematic chapters. Each chapter is in accordance with the unified directory structure introduction development process major study achievements problem and prospect representative works as well as a lot of references. It is useful as a reference both for scientists and technicians who are engaged in teaching researching and engineering of cartography and geographic information engineering.
