Understanding Young People's Science Aspirations Louise Archer, Jennifer DeWitt, 2016-08-12 Understanding Young People's Science Aspirations offers new evidence and understanding about how young people develop their aspirations for education learning and ultimately careers in science Integrating new findings from a major research study with a wide ranging review of existing international literature it brings a distinctive sociological analytic lens to the field of

science education The book offers an explanation of how some young people do become dedicated to follow science and what might be done to increase and broaden this population exploring the need for increased scientific literacy among citizens to enable them to exercise agency and lead a life underpinned by informed decisions about their own health and their environment Key issues considered include why we should study young people s science aspirations the role of families social class and science capital in career choice the links between ethnicity gender and science aspirations the implications for research policy and practice Set in the context of widespread international policy concern about the urgent need to improve increase and diversify participation in post 16 science this key text considers how we must encourage a supply of appropriately qualified future scientists and workers in STEM industries and ensure a high level of scientific literacy in society It is a crucial read for all training and practicing science teachers education researchers and academics as well as anyone invested in the desire to help fulfil young people s science aspirations **GCSE Science 9-1 - AQA GCSE**
