The Essential Concepts

A detailed illustration on a dark background showing several molecular models. In the center, a molecule with two large purple spheres connected by a thick, light-colored rod is shown. A green arrow curves upwards from this molecule towards a larger, more complex molecule in the upper right. Other smaller molecules, some with two purple spheres and others with three, are scattered around. A bright green beam of light originates from the bottom left corner and points towards the central molecule.

General Chemistry 6th Edition Raymond Chang:

General Chemistry Raymond Chang, Jason Scott Overby, 2011 The sixth edition of General Chemistry continues the tradition of presenting only the material that is essential for a one year general chemistry course It strikes a balance between theory and application by incorporating real world examples helping students visualize the three dimensional atomic and molecular structures that are the basis of chemical activity and developing problem solving and critical thinking skills Although the sixth edition incorporates many impressive features such as macro to micro artwork animations correlated to the text and hand sketched worked examples General Chemistry is still 200 to 300 pages shorter and much less expensive than other two semester textbooks Dr Chang s concise but thorough approach will appeal to efficiency minded instructors and value conscious students
